This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world’s books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that’s often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book’s long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ **Make non-commercial use of the files** We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ **Refrain from automated querying** Do not send automated queries of any sort to Google’s system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ **Maintain attribution** The Google “watermark” you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ **Keep it legal** Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can’t offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book’s appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google’s mission is to organize the world’s information and to make it universally accessible and useful. Google Book Search helps readers discover the world’s books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at [http://books.google.com/](http://books.google.com/)
THE BEQUEST OF

EVERT JANSEN WENDELL
(CLASS OF 1882)

OF NEW YORK

1918
THE

COMPANY DRILL

OF THE

INFANTRY OF THE LINE,

TOGETHER WITH THE

SKIRMISHING DRILL

OF THE

COMPANY AND BATTALION,

AFTER THE METHOD OF GEN. LE LOUTEREL.

BAYONET FENCING.

With a Supplement on the Handling and Service of Light Infantry.

BY

J. MONROE,

COL. 22D REGIMENT, N.Y. S. MILITIA; FORMERLY CAPTAIN UNITED STATES INFANTRY.

NEW YORK:

D. VAN NOSTRAND. 192 BROADWAY.

1863.
HARVARD COLLEGE LIBRARY
FROM
THE BEQUEST OF
EVERT JANSEN WENDELL
1918

Entered, according to Act of Congress, in the year 1862, by

D. VAN NOSTRAND,

In the Clerk's Office of the District Court of the United States for the Southern District of New York.

C. A. ALVORD, STEREOTYPER AND PRINTER.
MORE than a year ago the author of this small volume, executed the translation of about one-fourth of the Battalion Exercise of General Le Louterel, but avocations both civil and military interrupted the work, and in the mean time Lippincott, of Philadelphia, brought out the translation of the drill of the Battalion and the Evolutions of the Line, by Captain Coppée. But the Company Drill has not till now been offered to the public. I have modified the original so far as to conform to the existing system. The method of Le Louterel must have been well received in France. I have seen the seventh edition of his work.

An examination of the volume will best explain the peculiarities that distinguish it. Le Louterel did not apply his system to the skirmishing drill, further than the deployment and rally of the battalion. It will be found applied in this volume to the whole of the skirmishing drill. In addition to the introduction of the doubling and undoubling of filos (not found in the original), I have system-
atically compared the movements with the French *Ordonnance* of 1861.

The Bayonet Fencing is taken from the same *Ordonnance*. It is remarkable for its simplicity and the great facility of its acquisition, and it carries the approval of the highest authority of France.

In the supplement will be found some suggestions that will perhaps be acceptable to the intelligent classes who now fill the army, and who, however unused formerly to military ideas, adopt the leading principle of aiming to improve whatever they engage in.

Some allowance for trifling errors may be needed, in consequence of the fact that the volume comes out during the absence of the author in the field.

BAYONET FENCING.

GENERAL PRINCIPLES OF FENCING.

FENCING is the opposition of force with the edge or point of weapons held in the hand, and resembles both boxing with the closed hand and hurling a missile. It depends upon the correct attitude and movements of the body, and the lines of direction of the instrument, or weapon, employed.

The body resting erect upon the feet brought together, is supported upon a base that is narrow and consequently weak—a slight pressure, in that case, will overset it, and the higher the point of such pressure, the less the overturning force required; but when one foot is advanced, the side turned, and the rearward line of the body slanted, as nature herself instructs, when a weight is to be heaved, or an obstacle pushed, or resisted, the position is many times stronger. The base of support has been broadened, the height of the figure lessened, and the relations of mutual support so established as to apply the true leverage of the whole framework.

The body so propped and poised, the weapon (say, a sword) is to be advanced in such a manner that it may, at one and the same time, protect the
fencer and menace his adversary. This, referring to both the man and sword, constitutes the position of guard.

Guard, then, is a position in which to defend or attack.

Parry is a movement made from guard, with the weapon, to meet and ward off an adversary's attack.

Thrust (lunge) or cut is a directing of the point, or edge, against the adversary.

From every parry a thrust may be delivered—this is called counter-thrusting.

From every thrust or parry, you may return directly to the position of guard.

There are two general relations of the weapon from which all the rest are derived. These are carte and tierce. Carte guard and carte parries are inside; and tierce are outside. That is, carte is on the side of the breast, and tierce on the side of the back. For example, with the sword, where it is the right foot and side that are advanced, carte is the guard, or the parades, made toward the fencer's left, meant to cover attacks on that side. Tierce, in all respects, the opposite. But with the bayonet, the case is reversed, because then it is the left side and foot that are in advance. Here, therefore, the carte side of the weapon is that to its right, and tierce is outward or left.

Feint.—To menace an attack in one direction, and deliver it in another. It is, as the word imports, a movement intended to deceive the adversary, or to throw him off his guard.

Timing is anticipating an adversary by projecting a thrust at him in the very moment that he is
preparing himself to thrust. None but an expert fencer can execute effectively the time thrust.

The simple and direct thrusts are the best. Complex combinations are good for exercise and practice, as they confer facility of action.

*Opposition*, is the outward bearing of the weapon when a thrust is delivered, intended to bear the adverse point out of line. It must always be preserved, otherwise there is danger of an *interchanged* thrust.

In thrusting, let the *point* reach its limit at the moment the *body* is thrown forward to its extent. Let the whole act be simultaneous.

It is never safe to take the point off the body of a skilful antagonist. It should be constantly kept interposed, even in the parries. (In the instances of using the butt of the piece, the guard is supposed to be broken up, and then the butt itself stands in lieu of point.)

The point, in *guard*, should be so far raised as that the upper parries, inside and out, may cover the *body*, from the head to the legs. A thrust cannot be made, with the bayonet, at the lower limbs, without fatally exposing the thruster. Hence parries below are unnecessary and inartful, because in making such parries, the return thrusts from them would be the adoption and imitation of that which is itself a fault. The French system has wisely discarded all the low parries and thrusts.

All hanging guards, wherein the position of the piece when on guard (*point* higher than *hilt*) is reversed, that is, positions that throw up the butt and drop the point, are weak and unreliable.
The weapon may, in its length, be divided into three equal parts. The first third is that nearest to the holder; this is the forte, or strong part of the weapon; the second part is the medium or middle, and the last is the faible or weak part. The lever-age or universal principle of all fencing is, by movements and flexures of the body and limbs, and by collisions of the pieces to bring one's forte into contest with the faible of the adversary. When art does this, mere strength cannot reply to it.

The short treatise which follows is taken entire from the French system of 1861. It is much simplified, and having been revised by their board of officers, as stated in the Emperor's decree; it may be regarded as the result and selection out of the numerous methods proposed of late years, in France. Its distinguishing features are: 1st. Natural and simple methods of movement. 2d. The employment of upward guards and parries only. 3d. The discarding of the development, as unsuited to a two-handed and weighty weapon—such as the musket and bayonet—which is a true pike.

FENCING WITH THE BAYONET.

The men are formed in one rank with intervals of four paces between them, in order that they may not interfere with one another when they are executing the volts.

The pieces are carried at the right shoulder, that
is, in the "Light Infantry," or sergeant's manner of carrying the small arm.*

The soldier, or the squad, being at shouldered arms, the instructor commands:

1. Guard against infantry.  2. Guard.

* Piece in right hand—barrel nearly vertical, and resting in hollow of shoulder—guard to the front, right arm extended nearly to its full length, thumb and fore-finger embracing the guard—the other fingers closed on the handle of the piece—little-finger supporting the dog (the plate along the right thigh)—the left hand by the left side.
One time and two motions.

First motion.—Make a half-face to the right in turning on the heels, bringing the left toe to the front and the right toe to the right, the feet square to each other; raise at the same time, the piece slightly, and seize it with the left hand above and near the lower band.

Second motion.—Carry the right foot twenty inches to the rear, its heel on a perpendicular line with the left heel, the feet at right angles, the knees slightly bent, the weight of the body borne equally by the two legs; bring down the piece with both hands, the barrel upward, the left elbow against the body; seize the piece at the same time below the guard (i.e. at the handle), with the right hand, the arms falling naturally, the bayonet slightly elevated. (The left arm is consequently a little bent.)

Shoulder arms.

Raise the piece with the left hand, place it against the right shoulder, and at the same time, bring up the right heel on the alignment of the left, in facing to the front.

1. Guard against cavalry.  2. Guard.

The same as "guard against infantry," except that the right hand rests at the hip, and the bayonet is at the height of the eye, as in the movement of "charge bayonet."

The men placed in either of the foregoing posi-
tions of "guard," will execute the following movements:

1. **Right (or left).**  2. **Face.**

Turn on the left heel, raising the toe, and face to the right (or left), at the same time carry around the right foot one quarter of the circle, and twenty inches in rear of the left.

1. **Right about.**  2. **Face.**

Turn about to the rear, by the right on the left.
heel, raising the left toe, without altering the position of the piece, and carry the right foot around to the rear, twenty inches from the left.

1. **Left about.** 2. **Face.**

Turn on the left heel, to the left, the reverse of the last movement above.

1. **Step to the front.** 2. **March.**

Bring up the right foot behind the left, and carry the left twenty inches in advance of the right (keeping the knee bent during the movement).

1. **Step to the rear.** 2. **March.**

Draw back the left foot against the right, and plant the right to the rear twenty inches.

1. **Step to the right.** 2. **March.**

Throw the right foot twenty inches to the right, and in the same direction, immediately carry the left foot in front of it, at its proper distance and position.

1. **Step to the left.** 2. **March.**

Throw the left foot twenty inches to the left, and promptly place the right foot at its proper distance in rear.
1. **Double step to the front.** 2. **March.**

Throw the right foot twenty inches in front of the left, and briskly plant the left, twenty inches in advance of the right, preserving the position of "guard."

1. **Double step to the rear.** 2. **March.**

Throw the left foot fourteen inches to the rear of the right (passing it on its left), and carry the right twenty inches in rear of the left, preserving the position of "guard."

1. **Volt to the right.** 2. **March.**

Bring up the left arm and hand, the barrel opposite the left shoulder, without moving the right hand. Turn to the right on the right toe, throw the left foot perpendicularly to the rear twenty inches, finishing the volt on the left toe, and bringing the right foot to its position in rear, at the same time bring the piece to the position of "guard."

1. **Volt to the left.** 2. **March.**

Turn to the left on the right toe, carry the left foot perpendicularly to the rear twenty inches, and finish the volt in a way the reverse of the above.

When the men are well established in these various positions, and can execute the several steps and volts with ease and precision, they will be taught the attack and defence with the bayonet.
1. *In carte.* 2. *Parry.*

At the second command, lift the muzzle a full foot (thirteen inches) with the left hand, without moving the right, at the same time make a parry to the right of about six inches, and remain in that position.

**Guard.**

Lower promptly the left hand without moving the right, and bring back the piece to the position of "guard."

Whenever the instructor causes the parries and thrusts to be executed, he will at the end of each movement command "guard," at which the men will resume that position.

1. *In tierce.* 2. *Parry.*

Raise promptly the piece one foot with the left hand, without moving the right, at the same time making a parry with the piece to the left, about six inches.

1. *In prime.* 2. *Parry.*

Spring up the piece to cover the head, holding it with both hands and the arms fully extended, the lockplate turned toward the body, the bayonet slightly inclined to the left, the lower band at the height of the top of the cap (the piece is
nearly horizontal, butt to the rear, point to the front, hands held vertical).

1. *In prime to the right.* 2. *Parry.*

Advance the left shoulder and parry prime toward the right.

1. *In prime to the left.* 2. *Parry.*

Advance the right shoulder, and parry in prime to the left.
The last two parries are to oppose attacks from above—as from cavalry or a breast-work.

The prime parry is intended as a general protection for the head; the piece is moved around in the two hands as if on a pivot.—Translator.

1. In carte. 2. Thrust.

From the position of "guard," throw forward the weight of the body, bend the left knee and
straighten the right, project the left arm to its full extent, the fingers of the left hand opened and sustaining the piece, the butt in front of the nipple of the right breast, and the lockplate underneath.

Remain in this position until the command "guard."

Turning the lockplate underneath, gives the piece in the thrust a rotatory action.—Translator.

1. In tierce. 2. Thrust.
Throw forward the upper part of the body, straighten the right leg, and bend the left knee, extend the left arm to its full length, the fingers opened, and sustaining the piece, turn the guard, lockplate upward, guard to the right, the butt in front of the right breast (its nipple).

Raise the piece with both hands, the arms extended above the head, the guard upward, the barrel between the fingers of the left hand, bend
the left knee, and straighten the right, at the same time direct the point in thrusting at the height of an adversary on horseback.

1. *In prime to the right (or left).*  2. *(THrust:)*

Advance the left shoulder, and thrust to the right (or the right shoulder, and thrust to the left).
The thrust of prime has three general directions — direct to the front, to the right, and to the left — answering to the prime parried. — *Translator*.

**LONGE.**

Throw forward the upper part of the body, bending the left leg, and straightening the right, push rapidly the point toward the adversary the whole length of the right arm, abandoning it for the moment with the left, and come back to guard (without any command).

When on guard, as "against infantry," the blow (in thrusting) will be directed at the height of the breast.

In the guard against cavalry, the point will be directed at the height of a horse's head, or a horseman's side.

**Shortenings.**

The *shortenings* of the guard are necessary in a *mêlée*, or in foiling an attempt to break within the guard. They should be as simple, natural, and rapidly formed as possible, and permit an instant return to the guard.

1. *In carte.*  2. *Shorten.*

From either guard (against infantry or cavalry), throw back the piece to the full extension of the right arm, slipping the left hand up at the same time, to the bayonet clasp, left hand at the centre of the breast.
GUARD.

Throw forward the piece, to the position of guard, bringing back the left hand.

1. In tierce. 2. Shorten.

Throw the piece upward, and backward to the extend of the right arm, turning the barrel underneath, slipping the left hand to the bayonet clasp, the hand at the centre of the upper part of the breast, the piece nearly horizontal.
GUARD.

Lower rapidly the piece to guard, turning the barrel upward, and replacing the left hand.

After the men have perfectly learned the various steps, parries, and thrusts, they will be taught to combine them, as follows:

1. *Double step to the front, in prime parry, and thrust.*  2. *MARCH.*

At the word of execution—*MARCH*—the soldier
will execute the *double step*, will *parry*, and will *thrust in prime*.

As a soldier may be compelled to defend himself against two or three men at once, he will be made to execute double movements, and double thrusts, which will considerably increase his skill and activity, for example:

1. *One pace to the front—Longe—Volt to the left—in carte parry and thrust.*  
   2. *March.*

   At the command *March*, *step to the front, longe* (take the position of guard), *execute the volt to the left, parry in carte and thrust carte.*

**Lessons for Practice.**

I.

1. *In carte parry—in carte thrust.*
2. *In tierce parry—in tierce thrust.*
3. *In carte thrust—in carte parry.*
4. *In tierce thrust—in tierce parry.*
5. *In prime parry—in prime thrust.*
6. *In prime thrust—in prime parry.*
7. *Guard against infantry—Guard against cavalry.*
8. *Guard against cavalry—Guard against infantry.*

II.

1. *In carte parry—in tierce parry.*
2. *In tierce parry—in carte parry.*
3. *In carte parry—in prime parry.*
4. *In tierce parry—in prime parry.*
5. *In prime parry—in carte parry.*
6. *In prime parry—in tierce parry.*
7. *In carte*, *in tierce*, *in prime* **PARRY**.
8. *In tierce*, *in carte*, *in prime* **PARRY**.
9. *In prime*, *in carte*, *in tierce* **PARRY**.
10. *In prime*, *in tierce*, *in carte* **PARRY**.

**III.**

1. *In carte* **THUST**, *in prime* **PARRY**, *in prime** **THUST**.
2. *In prime** **PARRY**, *in prime to the left** **THUST**, *in carte** **PARRY**, *in carte** **THUST**.
3. *In tierce** **THUST**, *in prime** **PARRY**, *in prime to the left** **THUST**, *in tierce** **PARRY**.
4. *In carte—tierce—prime**, **PARRY**, *in prime** **THUST**.
5. *In tierce—carte—prime** **PARRY**, *in prime** **THUST**.
6. *In prime—carte, and tierce** **PARRY**, *in tierce** **THUST**.
7. *In prime—tierce—carte** **PARRY**, *in carte** **THUST**.

The foregoing movements originate from the position of *guard*, and when finished, the soldier at once returns to *guard*, without any order.

The movements may be combined with the steps, the *volts* and the *facings*.

The chief point required is facility in handling the piece correctly in the various oppositions and attacks. The attainment of this divides itself into two parts: 1st, the readiness to throw the piece and person into the several individual positions, and 2d, the rapid transition from one position to another.

The nicety of the sword exercise is inapplicable to the bayonet—the principles that govern the two are the same—but the applications vary widely. The dispute with the bayonet is necessarily brief, and its whole handling ought to be *simple* and *direct*. 
SCHOOL OF THE COMPANY.

The first sergeant commands, *Fall in*, repeated by the other sergeants. The corporals and privates form in two ranks in the order of height from right to left—the tallest corporal on the right and the shortest on the left of the front rank—distance between the ranks thirteen inches—the pieces at order arms.

The first sergeant then places himself four paces in front of the centre, facing to the company, and calls the roll. This finished, he faces about, and reports the result to the officer commanding the company, who at a position four paces in rear of the sergeant, has superintended the roll-call. The sergeant next takes post on the right of the front rank, when the captain marks off the platoons and sections, and places the taller of the remaining two corporals on the left of the first platoon, and the other corporal on the right of the second, both in the front rank. The first platoon must have an *even number* of files. The captain then commands, *In each rank*—count *twos*—when the two men of the first file call out *one*, those of the next file *two*, the third file *one*, the fourth file *two*, and so on to the left. The files thus numbered, the file-closers take their posts, two paces in rear of the rear rank.
### FIRST LESSON.

**To open ranks.**

The company being at ordered arms, the instructor directs the left guide to place himself on the left of the front rank, and then commands

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

1. *Attention.*
2. *Company.*
3. *Shoulder arms.*
4. *To the rear open order.*

The right and left guides step to rear the distance of four paces (of 28 inches). The instructor, at the right flank, sees that they mark correctly the alignment for the rear rank.

The rear rank steps to the rear, and is aligned between the two guides by the first sergeant.

The left guide takes

<tbody>
<tr>
<td>his post as a file-closer, and the rank of file-closers place themselves two paces from the rear rank.</td>
<td></td>
</tr>
</tbody>
</table>

Alignments in open ranks.

Having marched two, or four, men on the right or the left of each rank two or three paces forward, the instructor commands...

By file (right or left)—Dress.

The men of each rank move upon the line successively, preceded by their neighbor on the side of the alignment two paces, align themselves on the basis, and cast eyes to the front without a command.

After the successive alignments, the ranks are aligned entire (on a basis as above) forward, backward, and on a line parallel or oblique to the original one. The in-

</tr>
<tr>
<td></td>
<td>2. <em>Front</em>.</td>
</tr>
</tbody>
</table>

When the alignment is oblique, in *open*ed ranks, the rear rank men need not cover their file leaders.

In all the alignments, the captain and covering sergeant are on the flank of the side of alignment—each superintends his rank, and when these are *open*, passes, after each aligning, along its front, to make corrections.

Manual of arms (in open ranks).

The instructor, placed on the flank so as to see both ranks, commands the manual in the following order:

- **Present arms.**
- **Order arms.**
- **Ground arms.**
- **Raise arms.**
- **Support arms.**
- **Fix bayonet.**
- **Charge bayonet.**
- **Trail arms.**
- **Unfix bayonet.**
- **Secure arms.**
- **Load in nine times.**

*Shoulder arms.*
To close ranks.

1. **Close order.**
2. **March.**

The rear rank closes on the front, each man directing himself on his file leader.

Ranks are always opened and closed in quick time.

**Alignments and manual in closed ranks.**

Every thing is executed as in opened ranks, except that the captain, not the instructor, commands... and except that, in the manual, **Ground arms, Raise arms, and Secure arms**, are omitted.

If the instructor wishes to rest the men, still preserving the alignment, at an order, or support, he commands **In place. Rest.**

The men will keep one or other heel on the alignment.
**EXPLANATIONS.**

| But if he wish to rest without keeping the dress. | **REST.** |
| And the men merely do not quit their ranks. After the latter rest (but not after the former), the ranks are to be dressed anew, whenever the command is given. | |

As a more complete rest, the instructor may, at ordered arms, command *Stack arms*, and, 1. *Break ranks*. 2. *MARCH*, afterward re-forming the company by the commands, *Fall in*, and *Take arms*.

**SECOND LESSON.**

**Loading in four times and at will.**

These two loadings are executed as in the School of the Soldier. In both of them the captain and covering sergeant half face to the right with the men at *prime*, and face to the front when the company (or the man on their left) *shoulders*. 
The fire by company.

The instructor

1. *Fire by company.*

The covering sergeant falls back into the line of file-closers, and the captain places himself four paces in rear of that line opposite the centre of the company.

2. *Commence firing.*

The captain adds

The pieces being reloaded and at a ready, the captain repeats the last three commands till the *roll.*

To stop the firing...

To recall the captain and sergeant into line.

The captain and covering sergeant take the same positions, and are recalled into line in the same way, in all the firings. A *roll* of the drum and a *tap* are substituted, when cartridges are employed, for the last two commands, and, in that
The fire by file.

The instructor...... 1. *Fire by file.*

The captain and covering sergeant take post as in the fire by company......

The fire begins on the right.

The first file fires, and the second aims as the pieces of the first are brought down to reload. This progression applies only to the first discharge.

To stop the firing...... *Cease firing (or left oblique).*

To recall captain and sergeant...... *Cease firing.*

1. *Fire by file.*
2. *Company.*
4. *Commence firing.*

The captain, covering sergeant, and file-closers execute all that has been said for facing by the rear rank.

TO ADVANCE IN LINE OF BATTLE.
THIRD LESSON.

To advance in line of battle.

The instructor throws himself twenty-five or thirty paces in front, faces to the captain and covering sergeant, places himself on their direction, and then commands... 1. *Company—Forward.*

A sergeant, previously designated, places himself six paces in advance of the captain, and is assured in the direction by the instructor to whom he faces, after which this sergeant takes points on the ground in the right line which, drawn from himself, would pass between the heels of the instructor, who commands... 2. *March.*

The men take the touch of the elbows toward the side of the directing sergeant; the one next to the captain marches a little in rear of him, preserving the line of his shoulders parallel with his. The captain marches in the trace of the directing
To Halt and Align the Company.

### Explanations

<table>
<thead>
<tr>
<th>Commands of Instructor</th>
<th>Commands of Capt. or Lt.</th>
</tr>
</thead>
</table>

Sergeant, keeping the distance of six paces between them.

If the men lose the step, the instructor commands *To the step*, at which they recover it by a glance at the directing sergeant.

The captain and directing sergeant may be placed either on the right or left flank, and the ranks may be either opened or closed.

**To halt and align the company.**

The instructor commands ............... 1. *Company.*

The directing sergeant remains in front, unless ordered to retire.

If the alignment is very defective, the instructor advances two or four files, on the side of direction for a basis, and aligns the company on it. But if it be not so he simply commands ....

Captain rectify the alignment.

The captain directs this or that file forward, or back, in the front, and the covering sergeant does the same in the rear rank.
**Oblique March in Line of Battle.**

The company being in the direct march...

The directing sergeant maintains his shoulders squarely in oblique line. The captain conforms his march to that of the sergeant. The men in the rear rank march in rear of the man next to their file leaders, dressing toward the side on which the oblique is made.

To resume the direct march...

The company ceases to oblique, and marches direct.

The instructor, from a point twenty paces in front of the captain, rectifies the direction, if needed, of the directing sergeant.

</tbody>
</table>
The directing sergeant will take his place promptly, assured on his direction by the instructor. In all other respects the movement is executed as if it had been begun from a halt.

If, instead of 3. March above, the instructor commands:......4. Halt.

The company faces about in marching, and then halts. In other respects, it is as if it had first halted and then faced about.

The company will march in line, in advance, and retreat, and obliquely, by the command:..........8. Double-quick.

If the pieces are shifted to the right shoulder, the rear rank, by shortening the first steps, will increase its distance, if in quick time, to sixteen inches, and if in double-quick to twenty-six inches. At the command, halt, the pieces are brought to
the shoulder, and the rear rank closes to thirteen inches. If the pieces are trailed at the double-quick, they are to be shouldered, when the company halts—the same as when the time is quick and the pieces at a support.

COMPANY RIGHT FACE.

FOURTH LESSON.

The march by the flank.

The company being in line, and at a halt...

The whole having faced, the files double, the rear rank men and file-closers taking a side.
step to the right. The captain and covering sergeant take a side step to the left, so that the sergeant may be in front of the first man of the front rank, and the captain on the left of the sergeant.

To move forward...

2. Forward.
3. March.

The company faces to the left by substituting left for right, above. The left guide places himself before the leading man of the front rank, the captain on the guide's right, and the right guide behind the last man of the front rank.
### To change direction by file.

The company marching by the right flank, or at a halt.............

1. *By file left*
   (or right.)
2. *March.*

To whichever side the turn is made the man on the inside shortens five or six of his steps, and the one on the outside takes steps of the usual length. Both describe an arc of a circle. The touch of elbows is always to the side of the front rank man.

### To halt the company and face it to the front.

The instructor commands.................

1. *Company.*
2. *Halt.*
3. *Front.*

The company faces to the *left*, if it had been faced by the right flank, and *vice versa*. In both
DDoubling and undoubling files.

The company, in line of battle and marching to the front, the instructor may command*.

1. Company by the right flank.
2. Halt.

The company will face in marching halt, and immediately double the files.

The company marching by the right (or left) flank, the instructor may command.

1. Company by the left (or right) flank.
2. Halt.

* Casey's Tactics. The practice of these movements will facilitate the doubling and undoubling when in march.
### EXPLANATIONS

The company will face to the front (or rear) in marching, halt, and undouble files.

If in facing to the **right** or **left** the company becomes faced to the **rear**, the numbers undouble so as never to intervert the order of the two kinds of numbers in the **rank**: that is, if the rank were to be then faced **about**, the order of the numbers, counting from the same flank is the same. (If the face is from the **right flank** face to the rear, the odd step up to the left of the even numbers. If from the **left flank** face, to the rear, the even step up to the right of the odd numbers.)

But, being in any way faced to the rear then facing to either flank, the doubling is precisely the reverse of what takes place when facing from the front. For example, the company being faced to the rear, when the command is given by the instructor.

1. **By the left flank.**
2. **Halt** (or **2. March**).

The company faces to its left, and the even numbers place themselves on the **left** of the odd.

If, instead, the in-

structor

| The odd numbers place themselves to the right of the even numbers.* |
|---|---|
| If, in facing to the right or left in marching, the company becomes faced to the rear, the captain places himself two paces in rear of the centre, and the guides pass into the leading rank. |

*Note.* "The movements of doubling and undoubling when passing from the flank march to the front march, ought not to be too precipitate, in order to avoid confusion."—French Ordonnance, 1861.

**To form the company on the right or left by file into line.**

The company marching by the right flank.

1. **On the right by file into line.**
2. **March.**

*Otherwise the position of the guides would be deranged.*
The rear rank marks time (doubled). The captain and covering sergeant turn to the right, march forward, and are halted by the instructor at six paces, at the least, beyond the rank of file-closers. The captain places himself on the alignment for the front rank, the covering sergeant on that for the rear rank, and behind the captain, each directing the alignment of his rank as their men arrive on it. The first file of the front rank, having continued the march, wheel to the right so soon as they have passed the sergeant, march abreast toward the line, at two paces from it undoubled, by the even numbers shortening his step for the odd number to pass before him; the latter inching to the right places himself on the captain's left, and the even number obliquing to the left takes his place on the left of the odd number. The next two of the front-rank men pass beyond the last two, turn to the right, and arrive on the line in the same manner, and so on, in succession, to the left of the rank. The rear-rank men, doubled, execute the same thing, taking care to mark time till they see four men of the front rank on the line, and to cover accurately their file leaders.

Marching by the left flank the formation follows the same principles, *left* being substituted for *right*
in the command above. It is the odd number that shortens his step, and the even that precedes, in undoubling on the line. The captain and left guide remain at the left, till the instructor directs them to take their posts in line of battle. The instructor should be placed opposite the right (or left) file to mark the basis of alignment, and, that done should pass along the front, to observe the files as they arrive on the line.

The company marching by the flank to form company or platoon, and to face them in marching.

The company marching by the right flank, the instructor orders the captain to form it into line who, facing to his company, commands........ 1. By company into line.

The covering sergeant marches straight on. The men advance the right shoulder, take the double-quick step, undoubling the files, and by the shortest route place themselves on the alignment of the sergeant, taking the step from him. The rear-rank men follow their file leaders. The
company formed, in line, the captain commands.

The left guide places himself on the left of the front rank, and the captain two paces in front of the centre.

If the company is marching by the left flank, the commands and means of execution are the same, and the last command is guide right, when the covering sergeant becomes the guide, the second sergeant remaining on the left of the front rank.

In a company which is, or is supposed to be, part of a column, these two sergeants are always posted as above, and one or other is charged with the direction. They are styled right and left guide respectively. If (marching by either flank) the company had faced about before coming into line, the files so undouble that numbers one and two of the front rank arrive on the line together and abreast, the rear-rank men of their group obliquing to cover them in file.

The instructor wishing to form platoons, instead of company as above, gives the order to the captain, who,

The captain places himself before the centre of the first platoon, the first-lieutenant passing by its right flank before that of the second, the men move into line as in the last instance, the platoons formed, each chief commands. At this, the first sergeant passing rapidly along the front, places himself on the left of his platoon, and the second sergeant takes the left of the second.

When the march is by the left flank the principles are the same. Both the captain and first-lieutenant pass around the left of the company, each to place himself in front of his platoon; each gives the command, guide right, and it is the guide of the second platoon that passes to its right.

All these movements may be executed by direct commands of the instructor.

The instructor will exercise the company in passing from the front to the flank march, and re-

To march in column.

The column, being right in front (i.e., the first platoon leading) the instructor throws himself twenty-five or thirty paces in front of the leading guide and facing to him, the guide takes points in the line which passes through the heels of that officer, who then commands...

1. *Column forward.*

The chiefs of platoon repeat the last command.

The men touch elbows toward the guide, the man next to him will take care never to march beyond him, and not to touch elbows with him, but to preserve an interval of six inches between them. The rear guide follows...
the trace of the one in front. If the latter is directed to incline at a given point, the rear guide makes the same change of direction when he arrives at the same point. The chiefs see that the platoons conform to the guides.

The guides are to preserve the direction, step, and distance, of which the last is the most important.

In column, chiefs of subdivision repeat the commands *march* and *halt*, likewise when the column moves to form line, but not *vice versa*.

A column left in front, takes the guide to the *right*, that is all the difference that there is in the commands and execution.

**To change direction.**

The change of direction, in column, is always made by a wheel, on a movable pivot. The guide is taken therefore to the side *opposite* that wheeled toward. If it is wished that a column right in front change direction to the left, the instructor commands *guide right*, and goes himself or sends a marker to the intended point, which is taken on the side of the guide, who directs himself so as to

**SIXTH LESSON.**

To break into platoons and to re-form the company.

The company being in march, as part of a column right in front, the instructor gives the order to the captain, who, facing to the company, commands.

| | 1. Break into platoons. |

7
and then places himself before the centre of the first platoon. The first lieutenant, passing around the left flank, places himself in front of the second, and commands. 

Mark time.

The captain adds. 

The first sergeant.

2. March.
<table>
<thead>
<tr>
<th>EXPLANATIONS</th>
<th>COMMANDS</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>passing along the front, places himself on the left of the first platoon which marches directly forward, the second platoon marks time, its chief, so soon as it can pass, commands</td>
<td></td>
<td>1. Right oblique</td>
<td>2. MARCH.</td>
</tr>
<tr>

<td></td>
<td>1. Forward</td>
<td>2. MARCH.</td>
</tr>
</tbody>
</table>

In a column left in front, the means are inverse. The second platoon marches on, while the first obliques, while it is the left guide who passes to the right flank of the second (now leading) platoon, the right guide remaining at the right of the first.

To form the company, the right being in front, the instructor gives the direction to the captain, who commands:

The chief of the second cautions it to march directly on.

The lieutenant repeats.

Form company.

1. First platoon.

2. Right oblique.

3. MARCH.
The first platoon oblique, its guide shifts to its right flank, when it has nearly unmasked the second platoon, its chief adds at the instant of unmasking.

So soon as the second platoon shall be nearly in line with the first, the captain commands Forward.

The lieutenant retires, and at the instant the platoons unite, the captain adds At which they step out together.

In a column left in front the company is formed by inverse means, applying to the second (then leading) platoon what has been said of the first, and reciprocally. The guide of the second passes to its left flank, the guide of the first remains at its right, the chief of the second commands Forward, and the captain, March.

The movements of breaking and forming company may be executed by the instructor's direct
commands, which would be the same as those given above by the captain.*

To break files to the rear, and to bring them again into line.

Files are to be so broken that, whereas they were marching by the front, they shall be marching in the same direction by the flank. The files broken off must so cover in file that they may either come back to the front, or unite with the other files in the march by the opposite flank. Whatever the mode adopted, the files broken off must, in effect, double, and gain the rear of the nearest files that continue in line. The method prescribed in General Casey's Tactics seems so superior to others, that it will be preferred here. His principle is, to apply to files what is performed by a subdivision at the command, 1. By the right (or left) flank. 2. By file left (or right.)

The instructor gives the direction to the captain, who turning to his company, which is marching in

* It is obvious that the movements in the text oblige the column to deviate to the right when the right is in front, and to the left when the left is. If the following platoon should oblique into line, in the double-quick step, (on the principle of the passage of obstacles in the battalion manoeuvres) the inconvenience would be avoided.

nearest files which have continued to march. The left guide closes in to the flank.

If another, or other, groups are ordered to the rear (by the same commands) that, or those, already there advance the outer shoulder, shorten the step, and gain ground to the right, in order to leave space for the new files, and to cover them in file. The guide as before gradually closes to the flank.

To bring the files back into line, the instructor directs the captain, who facing to the company commands.

The designated files come into line, precisely as files do when the command is, *By company into line*. Those that remain in rear gain ground to the left and close on the flank, the guide opening out to permit the files that enter to pass into line.

The captain faces to the company to superintend the breaking and forming of the files. The in-
<table>

</tr>
</thead>
</table>

structor is on the flank for the same purpose. If there is an odd file, it must be broken off separately, the doubling and undoubling requiring this. The others are broken by groups (two, four, six files) for the same reason. The march demands that files be broken only from the side of direction (that of the guide). [It is seen that a section or a plate may be broken off and brought into line, on the same principle.] The file-closers are placed as in other flank marches.

In a column left in front, the principles are the same, the commands and means of execution are inverse.

The march in column of route.

The habitual rate is one hundred and ten steps in a minute. The company being at a halt, the instructor commands...

1. Column forward.
2. Guide left (or right.)
3. Route step.
4. March.

</tr>
</tbody>
</table>

[Hardee and Casey direct the movement as above. Looking at the fact that the ranks are a pace apart, that they have to double the files, and that the step is not supposed to be regulated, it is a question whether the cadenced step should not be first resumed. Scott's Tactics required that it should be, and the French Ordinance of 1861 prescribes that arms be *shouldered* and the cadenced step resumed as preparatory, which would close the ranks even nearer than in the case of passing from Route-step, to Quick-time, as seen above.]

The company marching by the front, in the route-step, is broken into platoons, and is re-formed, the same as when marching in the cadenced step, with this single exception, that the chiefs of platoons take the places of the guides, and these fall back into the rear rank.
Platoons may be broken into sections, but only in column of route, and not then, unless the platoons have at least twelve files, because if there were less than twelve files in the platoons, the column of sections (there being a pace between the ranks) would in marching extend itself beyond its proper depth.

To form sections the instructor gives the order to the captain, who commands

The platoons break in the same way that the company breaks into platoons. The captain commands the first section, the second lieutenant the second, the first lieutenant the third and the next in rank the fourth.

Chiefs of sections take the places of their guides, and these fall back into the rear rank.

The file-closers close up to within a pace of the rear rank.

To re-form the platoons the instructor gives the order to the captain,

**[In both the foregoing movements, the French Ordinance requires arms to be shouldered, and the cadenced step taken, prior to their execution.]**

Marching in column of platoons or sections, the company may be marched in the same direction by the flank, by the commands: 1. *By the right flank.* 2. *By file left, &c., as in column by company.* Likewise files may be broken off, in the same manner, observing, however, that the *section* must not be reduced below six files, not counting its chief.

The company marching by the flank will double and undouble files on an intimation from the instructor to the captain, who after causing the cadenced step to be resumed and arms to be shoul-
<table>

<tr>
<td>dered or supported, commands.</td>
<td></td>
<td>1. In two ranks undouble files.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2. March.</td>
</tr>
</tbody>
</table>

If marching by the right flank, the odd numbers march on, the even shorten the step and oblique to the left, behind the odd. The rear rank close to the left to touch elbows with the front-rank men.

If the march be by the left flank, it is the odd men who oblique behind the even. The company may, in a similar manner, substituting one rank for two ranks in the command above, be formed from two ranks into one, on the flank march. The files all mark time, except the guide and first man of the front rank, who continue to march; each rear-rank man successively, as room is made, steps in behind his front-rank man, followed promptly by the file-leader of the next file. To pass from single file to double, the captain commands:

The rear-rank men step out on their right.
<table>

<td>1. Company.</td>
</tr>
<tr>
<td></td>
<td>2. HALT.</td>
</tr>
<tr>
<td></td>
<td>3. FRONT.</td>
</tr>
<tr>
<td>The company undoubles files.</td>
<td></td>
</tr>
</tbody>
</table>

The company in two ranks being in march by the front, and right in front.

The instructor commands

| The left guide and left file continue the march to the front. The other files half face to the left and double, the step is lengthened | 1. In four ranks, form company. |
| | 2. By the left, double files. |
| | 3. MARCH. |
so as to keep on the alignment of the guide, toward whom the obliquing files close, and each faces to the front, so soon as the interval on its left is closed up, and resumes the direct step. The rear-rank men shorten the first steps to permit the odd numbers to enter the file.

The company so formed in four ranks, to form it, in the march by the front, into two ranks, the instructor commands.

1. *In two ranks, form company.*
2. *By the right, undouble files.*

The left guide and file continue the march. The other files oblique to the right, lengthening the step in order to keep in line with the guide, when the second file from the left has taken sufficient distance to permit the left file to come into line, the second, half facing,)
resumes the direct march, and the left file undoubles into line, and so successively of all the other files, each forming into two ranks, as soon as that next to it resumes the direct step.

The last two movements (as seen above), are made either from, or toward, the guide, consequently, with the left in front, the commands and means are inverse, left being substituted for right.

The last four movements may be executed in the double-quick.

The oblique march is confined to the march by the front, and the Tactics do not direct it to be ever begun from a halt.

All the marches (except the backward march) of the third, fourth, fifth, and sixth lessons, may be executed in the double-quick step, to effect which the cautionary command Double-quick precedes the command March.

In the double-quick step the pieces are to be carried either at the Right shoulder shift, or at a Trail. In the latter case, the command to trail arms, precedes the command Double-quick, March. In the former the men shift the pieces to the right shoulder, at the command Double-quick.

In wheeling, if in the quick time the pivot flank takes steps of nine inches, if in double-quick, of eleven (about a third of the step at the marching flank in both cases).
TO DEPLOY FORWARD.

ARTICLE I.

Deployments.

*By skirmishers* is meant light troops deployed in extended order, having intervals between their groups, files, or individual soldiers.

A company may be deployed either *forward*, that is, on a line in advance of the one it occupies, or, by the flank, that is, on the very line it occupies.

To deploy forward.

The deployment *forward* is made on some designated *file*, which moves directly forward, in the step indicated in the command, while the other files separate from it by oblique lines and in quicker time.

The platoons and sections are to be carefully marked, and the captain will see that the *centre files* of each are designated. (The last has reference to the *rallying* by platoon or section.)

The company being in line, at a halt or in march, to deploy the first platoon on its left file, holding in reserve the second platoon, the captain commands:

1. *First platoon as skirmishers.*  
   *On the left file take intervals.*
TO DEPLOY FORWARD.

<table>
<thead>
<tr>
<th>EXPLANATIONS</th>
<th>Commands of Captain</th>
<th>Commands of Lieutenant</th>
</tr>
</thead>
</table>

The first lieutenant places himself in front of the second platoon, and if the company is in march, commands...

If the company is at a halt, the lieutenant commands...

The second platoon marches backward three paces, of twenty-eight inches, its chief halts it, the second sergeant places himself on its left, the third on its right.

At the first command of the captain the second lieutenant places himself two paces behind the centre of the first section, the third lieutenant two paces behind the centre of the second section, the fifth sergeant one pace before the centre of the first platoon, and the fourth sergeant on its left.
The captain then adds: **March** (or **Double-quick** — **March**).

The left group of fours conducted by the fourth sergeant moves directly forward. The other groups extend out to its right, on lines more and more diagonal, moving in quicker time, and as they successively place an interval of twenty paces between themselves and the group nearest them on their left, they turn to the front and march in line with the left group, preserving the intervals. The left guide having reached the point where the left of the line of skirmishers is to rest, the captain commands: **Skirmishers—Halt.**

The groups not yet in line continue the march till they arrive on it. All the groups deploy, when on the line, into a single rank, each group upon its even-numbered front-rank man, who stands fast.
his rear-rank man forms on his left five paces distant, the odd-numbered man of the front rank extends to his right ten paces, and the rear man of the odd file is between these two, five paces from each. Thus when the interval between the groups is twenty paces, the habitual distance between the men of a group being five, the whole line in one extended rank is formed by skirmishers placed at equal intervals of five paces.

The line thus formed, the sergeants fall back ten paces, each in rear of their former posts in line.

Each chief of section, after rectifying the line, falls back twenty-five or thirty paces in rear of the centre of his section; with each of these officers is a group taken from the reserve, and a bugler, who is to repeat the signals of the captain's bugler.

If fired upon, during the deploying, the captain may deploy the groups as they successively gain their proper distances (from the group next on their left).

The captain is eighty paces in rear of the centre of the line, having with him a group of four and a bugler. (The groups with the captain and lieutenants are deployed like those in line.)
EXPLANATIONS

At the beginning of the deployment the first lieutenant faces *about* the second platoon, and marches it to a point one hundred and fifty paces in rear of the centre of the line, holding it at that distance as the reserve.

Where no reserve is required, the entire company can be deployed on the same principle. In this case the first lieutenant commands the second platoon, the second the first, and the fourth and second sections are commanded by the next in rank. The fifth sergeant is the guide of the centre. The lieutenants each have a bugler (but not a group) with them.

The forward deployment may be made on any file of the platoon or company. If the right file be selected as the directing one, the others incline diagonally and extend to the left. If an interior file is the directing one, the groups diverge from it to the right and left, and is conducted on its right by the fifth sergeant. For example, the captain wishing to deploy on the centre file, commands.................

The fifth sergeant places himself in front to conduct the right.
## TO DEPLOY BY THE FLANK.

### To deploy by the flank.

This deployment can be made only from a **halt**.

The captain commands: 1. *Second platoon, as skirmishers.*

... The first lieutenant places himself two paces behind the centre of the third section, the third lieutenant behind the fourth. The second lieutenant commands and marches the first platoon as prescribed for the reserve in the forward deployment. The fifth sergeant in front of the centre of the deploying platoon, the third sergeant at its right, and second at its left. The first and fourth
TO DEPLOY BY THE FLANK.

<tr>
<td>sergeants as guides of the reserve</td>
<td>2. <em>By the right flank, take intervals.</em></td>
<td></td>
</tr>
</tbody>
</table>

The first and third lieutenants take post two paces behind the left group of their sections.

3. *March (or double-quick March).*

The left group stands fast, the others face to the right and move off, halt in succession as each attains the distance of twenty paces from the group in its rear, face to the front and deploy by groups, as in the forward deployment. The third sergeant on its left, conducts the right group. Chiefs of sections follow up the movement, keeping near and supervising the groups as they halt. The deployment ended, officers and

| | of Captain | of Lieutenant |
| sergeantstake the posts prescribed in the forward deployment. The first platoon, as a reserve, likewise taking its position similarly. | | |
| If the extension is to be made by the left flank, the command is given accordingly, the principle is the same. | | |
| To deploy by both flanks the captain will command. | 1. Second platoon, as skirmishers. |
| All the dispositions are made as in the last deployment. | 2. By the right and left flanks, take intervals. |
| The first lieutenant behind the left group of the third section, the third lieutenant behind the right group of the fourth section. | 3. March (or double-quick March). |
| The two sections (except the right group of the fourth section which stands fast) face out- | | |
ward, and march off in opposite directions. As soon as there is the interval of twenty paces, the group that stood fast deploys, the others deploying successively as they attain their distances. The third sergeant conducts, on its left, the right file, the second sergeant the left.

On the same principle the deployment may be made in any interior group, the fifth sergeant being placed before it to indicate the point. The whole company may be deployed, like the platoon.

The foregoing movements complete the deployments.

To extend and to close intervals.

The intervals here referred to are those that separate the groups (twenty paces) and not those between the men (five paces). The principle is precisely that of the deployments, being either **forward** or by the **flank**.

The line of skirmishers being already formed, the captain wishing to separate the groups still further, and toward the left upon the **same line** of battle, will command:
110 TO EXTEND AND TO CLOSE INTERVALS.

<table>
<thead>
<tr>
<th>EXPLANATIONS</th>
<th>COMMANDS OF CAPTAIN</th>
<th>OF LIEUTENANT</th>
</tr>
</thead>
</table>

1. **By the left flank** (so many paces) extend intervals. 2. **March** (or *double-quick March*.)

At the word of execution, the right group halts, or if already halted it stands fast, the others face to the left, take the new distance prescribed, then halt, facing to the front. The distance is reckoned from the nearest man of one group to the nearest of the neighboring group. Officers and sergeants supervise, lead, and finally post themselves, as in deployments by the flank. And, as in those deployments, the extension may be made by either, or by both flanks, upon any designated group. The principle is the same. If made on an interior group, the fifth sergeant* makes it.

If it be intended to make the extension of intervals, on a line in *advance* of the existing line of skirmishers, the company (or platoon being either at a halt, or in march), the captain will command...

The directing group conducted by the guide, marches directly forward, the others ex-

<th>Commands of Lieutenant</th>
</tr>
</thead>
<tbody>
<tr>
<td>tend out from it, at a quicker step, gain the increased distance, and then move forward in line with the directing group.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To close intervals.

This movement is performed on the reverse principle of the extension. If the groups are to close by a flank movement, that is upon the existing line of battle, the captain will command.

1. *By the right* (or *left*) *flank* (*—* paces) *close intervals.*
2. *March,* (or *double-quick—March.*)

The right (or left) group standing fast, the others face to the designated flank, take the new distance, halt successively, and facing to the front.

If the closing is to be made on an interior group, the fifth sergeant marks it, as in the deployment, when the captain commands:

1. *By the right and left flanks* (*—* paces) *close intervals,* etc.
The groups, except the one designated face inward, close upon the former, to the prescribed distance, halt, facing to the front.

If the closing is not to be made upon the existing line of skirmishers, but in advance of that line, the captain commands.

1. On the left (right or centre) group (so many paces) close intervals, &c.

The directing group conducted by the guide, moves directly forward, the others inclining diagonally toward it, till the prescribed distance is attained, then moving directly to the front, dressing on the directing group.

The extension and the close may be made upon any group—either by a flank or a forward movement, whether the skirmishers are faced to the front or the rear, in march, or at a halt.

To support and to relieve skirmishers.

When the same extent of front is to be occupied by two companies, that had been held by one, the
supporting company deploys so as to be extended at twenty paces in rear of the right or left half of the line, and the new company moves upon the line, successively, as the groups of the old company, in closing, unmask it. (So that the whole front may remain continuous and unbroken.) The reserves of the two companies, in the rear, unite.

If the line has been occupied by two companies, and one of them is now to hold the same front, that the two had held, when it extends for that purpose, the company that retires will fall to the rear, by successive files, as they are replaced by the extension.

When a company is to be relieved, the captain will be informed, who will immediately inform the chiefs of platoons. The relieving company deploys forward, halting at twenty paces in rear of the line. Its captain then marches it rapidly a few paces beyond the former line and halts it. The old line assembles on the reserve—but not forming into groups until beyond the enemy's fire.

If the line to be relieved is in retreat, the relieving line deploys by the flank—and the old line passing through the intervals, forms on the reserve.

The general rule of light infantry, is to hold one half the force in reserve. But, at need, the reserve may be deployed as a supporting, or as a relieving line. Both platoons should be exercised in these two movements.
ARTICLE II.

The movement of deployed lines.

Deployed lines may move directly to the front or rear, by either flank; may file and wheel. They may fire at a halt or while in motion, except during the wheel.

To advance the line.

The captain commands

1. Forward.

The right, left, and centre guides throw themselves on the line, at its right, left, and centre

2. March (or double-quick — March).

March.

The skirmishers step off, the guide is always at the centre, unless the command has been given Guide right (or left). Chiefs of platoon (or section) keep their places in rear.

At the command... Halt.

Chiefs of platoons (or... Halt.

<td>1. <em>In retreat</em>.</td>
</tr>
<tr>
<td>At this the line ceases to wheel and marches to the rear.</td>
<td>2. <em>March</em>.</td>
</tr>
</tbody>
</table>

In the foregoing cases, at the command *Halt*—the line halts, facing to the front, if the wheel was made toward the rear.

If the line is advancing, or at a halt, in order to throw back a flank to the rear, the commands are,

1. *In retreat*. 2. *March*, followed by 1. *Right (or left) wheel—March*.

*Forward* means toward the enemy; *in retreat*
means to retire, and right and left flank refer to the flank which is then, whatever the position, at the right or left. Thus, if marching by a flank, the command, to move to the front is, 1. Forward. 2. March—to move to the rear, 1. In retreat. 2. March.

**ARTICLE III.**

The firings.

Whether the fire of skirmishers is commenced from a halt, or while marching to the front, rear, or by either flank, the captain commands...

To stop the fire the captain commands...

Both these commands are promptly repeated by the lieutenants and sergeants.

Being at a halt, at the command Commence firing the front-rank men fire (but not all at the same time), the rear rank men reserve their fire till their respective front-rank has loaded—when they likewise fire—the ranks alternating thus till the command is recalled.

To fire marching to the front.

The command Commence firing is given and repeated. The front-rank men halt, fire and re-
load. The rear-rank men of their files continue to march, halt at eight or ten paces, beyond their front-rank men, and fire when the latter have loaded. The fire is thus alternated between the front and rear rank men. If the command halt is given, the line is formed forward, on the advanced skirmishers.

To fire marching in retreat.

At the unvarying command, the front-rank men halt, fire—and throw themselves to the rear, loading—the rear-rank men marching ten or twelve paces beyond the former, halt, face about, and fire, after the front-rank men have passed ten or twelve paces, have halted and reloaded. The fire is so continued. If halt is commanded, the line forms on the skirmishers who are in rear.

To fire marching by the flank.

If the command is given when marching by the right flank, the front-rank man, of each file, faces to the enemy, steps a pace to the front and fires, while his rear-rank man marches on. Having fired, the front-rank man, loading on the march, follows the rear-rank man, who steps out, when the other has loaded, fires and follows in his turn. The files must not intermix, and when Cease FIRING is commanded, the front and rear rank man, if not in their original places, resume them.
122  TO FIRE MARCHING BY THE FLANK.

If the march be by the left flank, it is the men of the rear rank who commence the fire. The method of alternation then continues as before.

If the fire is from a halt, and the command is given, 1. Forward—March, the men whose pieces are loaded, advance, the others finish loading, and the fire proceeds as in the usual fire when marching by the front. If the skirmishers are firing on march by the flank, the same rule is observed—the men whose pieces are loaded stepping out to fire.

On the contrary, if the line is firing from a halt, whilst advancing, or when marching by a flank, and the command is given, In retreat—March, the men whose pieces are loaded remain in line, the others throw themselves to the rear loading, and the usual fire alternates as in the case of firing in retreat.

If the line is firing advancing, retiring, or at a halt, at the command, By the right (or left) flank—March, it is the men who have their pieces loaded that step out toward the enemy and deliver the fire, their fellows of the same file continuing the march.

[The purpose of all these arrangements is, obviously, to oppose the enemy with the loaded and not the unloaded pieces.

It will be observed that the principle of the firings is based upon files, while that of the deployments rests upon groups.]

<td></td>
</tr>
</tbody>
</table>
Rally on the reserve.

At this command the reserve forms half of a square, by throwing back its flank half sections, the men come to the ready, and open their fire as soon as the reserve is unmasked by the skirmishers. The latter form into groups upon the man of the group who is nearest the centre of the section. The groups incline to each other so as to form into sections; these are so directed by their chiefs, to the right and left, as to unmask the reserve, arrived at which they complete the square, and join in its fire, without waiting for a command.

If, during its march on the reserve, the chief of section command Halt, the section immediately forms circle around the officer.
If the whole company is deployed, and the command is given *Rally on the battalion*, the skirmishers direct themselves toward the nearest flank, and having passed its file-closers, form, in quick time ten paces in their rear. If there are several platoons so formed in rear of the battalion wings, they will be in close column, or at half-distance.

If the battalion is in square, the rallying skirmishers enter by its rear angles, and form close column of platoons in rear of its first front. If the battalion is in column to *form square*, the skirmishers form similarly in rear of the centre of the third division, and march forward, closing on the buglers, at the command *Form square—March*.

If the square is formed, and cannot be safely opened, the skirmishers will throw themselves at the feet of the front rank, dropping on the right knee, butt on the thigh, and bayonet advanced. They will, in the same way occupy the sectors without fire (the angles).

Skirmishers rallied behind the wings of the battalion, will be marched by the flank, through the interval (between battalions) when they are again to deploy in front of the battalion. In the case of their having been rallied in the interior of a column or square, they will be marched out by the flank and deployed again, as prescribed for the deployment of platoons at half-distance.
Skirmishers in square and column.

The skirmishers having *rallied on the reserve* and formed square under the immediate direction of the captain, he will hold it either in square, or in column at half distance, by platoon.

The captain commands

1. **Form column.**
2. **March.**

The guides place themselves on the right and left of the platoons, those of the second at half distance from the rear-rank of the first platoon, the platoons dress on their centres, the rear platoon facing about.

To form square again the captain commands

1. **Form square**
2. **March.**

If in march the column halts, the platoon in rear faces about, both platoons throw back their flank half sections, forming the square as at first.

sergeant, who conducts the right group of the fourth section.

If the deployment is to be by the flank, the only difference is that the sections pass the first platoon several paces, are then halted, and deployed by the flank.

The assembly,

Is intended simply to annul the deployment. While the rallies are always made at the run, the assemblies are made in the quick step.

The line being deployed, and at a halt, the captain commands: Assemble by the right (or left) flank. The skirmishers face to the designated flank—close toward its last group, which is forming itself, the other groups form in marching, close up successively, face to the front, and support arms.

To assemble by both flanks, the command is varied accordingly, the skirmishers face inward, and close upon the designated group.

To assemble while marching to the front, the captain, if he wish the formation to be on the centre, which would be the shortest way, commands: Assemble on the centre.

The centre guide marches directly on, followed by the direct-

ing file toward which the other comrades of that group incline. The men of the other groups form into groups upon those of their files nearest the directing file; the groups being formed incline toward, and successively unite with, the centre group, and bring their pieces to the right shoulder.

The step of the inclining files and groups is necessarily quickened.

The assembly may be made on the right, left or any other file. A guide should conduct the file. A line marching in retreat, is assembled on the same principle—the front-rank men following their rear-rank men.

**Assemble on the reserve.**

At this command the skirmishers reform the groups, on the line, the groups direct themselves upon the reserve, the rear rank leading, form themselves upon it in their proper places, and faced to the front. The company joins the battalion.
MANŒUVRES OF SKIRMISHERS.

EXPLANATIONS.

<table>
<thead>
<tr>
<th>COMMANDS</th>
<th>OF CAPTAIN.</th>
<th>OF LIEUTENANT.</th>
</tr>
</thead>
</table>

Manœuvres of Skirmishers.

The manœuvres of skirmishers consist in great measure of the movements of single companies, but the same principles are readily applicable to a battalion.

The battalion may be deployed as skirmishers, either from line of battle or from close column of companies.

The colonel designates in advance the companies that are to constitute the reserve, under the major. They are taken from the right or left flank, when the battalion is in line, and from the rear when it is in close column.

Each company (or platoon) covers, when deployed, a front of one hundred paces.

Whether the deployment is made from line, or from column, the words of command by the colonel are the same: the words of command of the captains, in deploying their companies (or platoons) are those of the company drill.

For the movements of the line when deployed—extending, closing intervals, the firings, &c.—the colonel applies the commands of the company drill, and the principle of the execution is absolutely the same.

A battalion of eight companies, being in line of battle, to hold in reserve the first, second, and third companies, and to deploy forward the remaining five on the right of the sixth, the colonel will make
known his intention to the lieutenant-colonel, major, and adjutant—directing the major to take charge of the reserve, and instructing the lieutenant-colonel as to the proposed direction of the line, and as to the point where the right of the sixth company is to rest. The lieutenant-colonel throws himself eight or ten paces in front of the sixth company's right, the adjutant the same distance in front of its left, the major in front of the intended reserve.

The colonel then commands.

<table>
<thead>
<tr>
<th>Commands</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>OF CAPTAIN.</strong></td>
</tr>
<tr>
<td><strong>OF LIEUTENANT.</strong></td>
</tr>
</tbody>
</table>

1. First (or second) platoon, as skirmishers.
2. On the right of the sixth company—take intervals.

The captain of the sixth company prepares to deploy his first platoon on its right file. The captain of the fifth to deploy his first platoon on its left file. The captain of the fourth company commands. Captains of the seventh and eighth companies.

The colonel adds...

| Right face. |
| March (or double-quick). |
| —March. |

| Left face. |
| March. |
The platoons of the fifth and sixth companies deploy forward. The fourth company, marching by its right flank, halts when opposite the right flank (deployed) of the fifth company, faces then to the front, deploys forward its first platoon on the left file, throwing its reserve to the rear.

The seventh and eighth companies gain distance to the left flank in the same manner; halt successively, and deploy in the same manner on their right files. The companies deployed dress on the directing company (in this instance the sixth).

The lieutenant-colonel and adjutant follow up the deployment on the right and left respectively, and afterward place themselves in rear and near the colonel, posted two hundred paces in rear.

The major, on an order from the colonel, will have faced about and marched the three right
companies directly to the rear thirty paces, halted, deployed into column at half distance, and afterwards he will have marched this battalion reserve to occupy the point selected for it by the colonel.

The company reserves are posted in echelon, descending from the right to the left (or, it may be, from left to right). The reserves of two companies are united, to form a stronger resistance to cavalry. In the present instance, the several reserves are posted—that of the sixth company, one hundred and fifty paces in rear of its right: the reserves of the fourth and fifth companies in rear of the centre of their line thirty paces in advance of that of the sixth, and the reserve of the seventh and eighth companies, opposite the centre of their line, thirty paces to the rear of the reserve of the sixth company. Thus, in an even number of deployed companies, the reserves would be half the number of the companies.

The battalion being in line of battle to deploy the companies by the flank, instead of deploying them forward—on the same point of direction—that is, on the right of the sixth company—the colonel commands as before—the captains of the sixth and fifth companies march them ten or twelve paces forward, by the commands: 1. Forward. 2. Guide Right. 3. March. They halt their companies and deploy them by the flank—the sixth by the left, the fifth by the right flank, as in the company drill—the reserve, if platoons are deployed, being
marched to the rear. The other companies march by the flank—those to the right of the directing companies by the right flank, the others by the left—halt when their distance of one hundred paces is attained—move forward on the line, and deploy by the flank. Each will wait till the next platoon toward the side of direction shall have finished its deployment.

**Deployment of Skirmishers from Column.**

The *close* column must be first formed.

Whether this deployment be made forward or by the flank, the directing company is moved forward ten or twelve paces in advance of the position just occupied by the head of the column. It is then deployed as commanded. The other companies march to their proper distance, to the right or left with respect to the directing company, then deploy individually, as before, whether forward or by the flank. *(The deployment of skirmishers from column is the combination of deploying into line of battle and this line's extension into skirmishing order.)*

When the color company is one of those to be deployed, the guard remains with the company, the color is detached to the battalion reserve.

When *Assemble on the battalion* is sounded, the companies assemble on their reserves, and then join the battalion reserve, taking their proper places in column.
Rallies.

All the rallies may be performed as prescribed for the company.

When *Rally on the battalion* is sounded, the skirmishers unite with their company reserves to form square—the reserve throwing back its flank sections, and the skirmishers continuing the formation, the last who run in completing the rear front—facing outward, in two ranks, and without regard to height.

These squares march upon the battalion reserve (forming themselves into column) as soon as they are able, or they seize any advantageous positions, in the interim.

The battalion reserve, if threatened by cavalry, forms square.

The colonel disposes the battalion reserve to protect the rally.

If the battalion reserve be formed in square, the other reserves, in marching upon it, will take the line of its diagonals prolonged, in order to be within its sectors without fire.

If the battalion reserve be held in column, the approaching company reserves will form in column with it; not, as in *assembling*, necessarily in their regular order, but in the order of their arrival, without regard to number, next in rear of companies already in the column.
SUPPLEMENT.

SKIRMISHERS should be gradually inured to the fatigue of the double-quick march, at the fixed rate of 165 steps to the minute. In this practice, it is even unsafe to continue it long in the beginning. The run (pas de course), of two hundred steps to the minute, should next be performed. Both these steps should be persistently timed, and their cadence well established. Without attempting here explanations of the causes, it is undeniable that rhythmic movements are performed with much less of exhaustion to the human frame, than unregulated efforts, and especially is this the fact when a consentaneous action of masses is required.

The French tactics (and their translators), err somewhat in saying that the double-quick step differs from the quick step only in its greater rate of march. In the walk, however fast, there is no instant during which both the feet are off the ground; while in the run, however slowly performed, there is, during each propulsion, a perceptible space when neither foot is in contact with the earth. The eye detects the difference easily. The double-quick (pas gymnastique), is in fact a slow run (or trot), and there probably never has been a time when this pace was not actually used in war. The step should be taken lightly, the weight falling on the ball of the foot, the knees somewhat bent,
but the legs flexible (not rigid), while the trunk should be kept as steady and immovable as possible. The arms should be contracted, because the bracing of the arm, shoulder, and pectoral muscles conduces to the strength and steadiness of the chest. The inspirations should be made quickly and deeply, and the expirations very slowly. The body more and more leaned forward as the march is prolonged. To be able to sustain the exertion required, the step must be practised and performed on right principles.

It is quite apparent that when the directing portion of a line is in quick time, and is to move over a shorter distance, that part that is to conform to it, and to traverse a greater distance, must move more rapidly. If, therefore, the time is commanded quick, all but the directing fraction, are to take double-quick time; and if double-quick is commanded, these latter must take the run. Quick time, then, is rather the exception than the rule in the skirmishers' drill.

Skirmishers are to carry their arms substantially "at will," but the trail (in either of the hands), has such advantages as these: it allows the soldier to drop upon the ground or under cover readily; to climb a fence, or cross a ditch or stream; fix his bayonet; and does not so much expose him to be seen, as when the piece is carried at or upon the shoulder.

Skirmishers must know how to take advantage of the ground, of knolls, trees, rocks, fences, walls, &c. When a group gets possession of such cover, the comrades are to give place to one another to fire from it. The passage from one cover to an-
other must be made warily, taking care to load
before quitting the former place.

Skirmishers are to be exercised in loading and
firing while kneeling, sitting, or lying on the
ground, taking care that in loading the piece is held
upright (the butt may be tapped on the ground),
for an instant, before ramming.

It is quite important that practice at the long
ranges be made—the efficiency of light infantry
depending much on the individual fire—marks-
manship is a necessary part of the instruction.
The alternation of the fire, between the front and
rear rank men, must yield to its deliberation and
effectiveness, as the precision of the alignment
must not interfere with the cover to the skirmish-
ers afforded by the circumstances of the ground.
The non-commissioned officers will see that the
men get under cover when practicable, and that
they do not fire without deliberate aim—not rap-
idly but with effect. It is more than ordinarily
important in skirmishing, to husband the ammu-
nition.

It has been seen that skirmishers load before
they advance, and in retiring, fall back immediately
after firing—to leave the front clear and to avoid
needless exposure.

Should skirmishers be dispersed, by an over-
sudden attack, the men must shift for themselves,
take trees, get up banks, behind fences, resort to
the bayonet fencing, and fire at any opportunity.
The officers must get together a few files, and en-
deavor to effect a rally upon some good positions.
In the case of a detached company, it is advisable,
to provide for such a casualty, by appointing be-
forehand some general place of rendezvous. There are noted instances where light troops have been so reassembled, without suffering great loss, after having been driven back and scattered.

Artillery has little effect upon the extended line of skirmishers, especially if they are lying flat on the ground or well covered—while their fire falls in return with great effect upon the other. In firing upon a battery the flanks of the line should endeavor to close forward, to obtain the advantage of the cross-fire, and the horses in rear should be selected as an object in order to disable the pieces for retreating. Moving the line thirty or forty paces forward, or to the rear, after the artillery has gotten its range, will serve to disconcert it.

When light infantry support artillery they should, usually, be posted on one or both flanks (not yet deployed, it may be), and a part of them may find a position from which to cross their fire with that of the artillery; if the guns advance, the light infantry may be ordered to cover their front, or to move forward parallel with them. In retiring, the infantry skirmishes to cover the withdrawal of the guns, and to afford them time to gain some distance to the rear.

In a broken or intersected country, and in woody and soft meadow lands, light infantry have the advantage over cavalry. In such ground cavalry will not venture to engage, seriously, skirmishers who manifest a resolute opposition. A single infantry man, who knows the use of his bayonet, is at least a match for an individual horseman.

Forty paces between groups is the extreme interval of deployment. The habitual distance
being twenty paces, if a less distance be named in
the command, the men in the groups must reduce
their intervals to correspond.

In covering the front of a battalion (in line), the
skirmishers must extend beyond the battalion front
half the interval to the next battalions on its right,
and left.

Whether covering the front of the battalion, or
its flank, and whether the battalion be in column
or line, the skirmishers are to conform their move-
ments to it.

Should it be in line, and a flank unsupported,
skirmishers are either to be extended along the
flank, or to be so far extended along the front as to
protect the flank.

If the battalion moves in echelon, the skirmish-
ers must half face, and gain ground, in the proper
direction by obliquing.

If the battalion passes into column from line, the
skirmishers will preserve their extension to cover
the movement. If they are masking the head of a
column, they will be extended so far as to cover
the deployment of the column into line.

When the formation in rear of the skirmishers is
complete, and they are ordered to quit the front,
they must leave it clear as soon as possible.

They should not cross the front of a square or
of a column.

Skirmishers should be thrown forward to cover
a change of front of the battalion.

If covering a line that moves to the attack,
skirmishers should be closed, at the proper mo-
ment, to the right and left to clear the front.

But it frequently happens that the skirmishers,
in the enemy's attack upon troops in position, are driven directly back upon them. In this case the troops of the line should throw back a few files from the left of the companies, opening intervals for the skirmishers to pass through.

When a line of skirmishers, whether advancing or retreating, is halted, they should lose no time in availing themselves of the cover the ground may afford. The non-commissioned officers should look to this.

If assailed by cavalry, and skirmishers can avail themselves of such an obstacle as a house, fence, or the edge of a ravine, they need not form square. Forming line with their backs to the obstacle will be sufficient.

The fatiguing nature of the duty requires that skirmishers be relieved from time to time.

**Rallies.**

The essentially new part of the drill of skirmishers, is the development upon the groups of fours. In the system that prevailed anterior to this late introduction of the French, the deployment was made upon the file as the fundamental unit, the directing file moved forward or it stood fast, according as the deployment was to be forward or by the flank; and at the proper time the file (as now the group) deployed, the rear-rank man stopping upon the general line two paces on the left of his file leader. In extending or in closing intervals the distance taken was that between files, the distance between the men of a file remaining invariably two paces. This method certainly has simplicity in its favor. The officer in command
expressed the number of paces to be taken for intervals, and was not limited, except by his discretion. In deploying by the flank, it was the duty of the front-rank man of the file to look to the direction (to follow exactly the trace of the preceding file); while the rear-rank man, casting a glance over the shoulder, determined the distance from the halting file in rear, and then cautioned his file leader, in a low tone, by the word halt. This, it would be well to continue with the groups.

It seems to be doubtful whether the system of groups be a positive improvement. A circumstance that strengthens the doubt is, the fact that the whole of the firing comes back to repose upon the file development. Perhaps rather too much importance is attached to the ingenious idea of the squares which are formed by the groups of fours. To calculate their value it should be considered, 1st. That any casualties that may have occurred before the formation would have rendered the numbering off erroneous, and would have made the groups less than four. The fragments would then, of course, join themselves to the neighboring squares, in which case these would no longer be squares of four. 2d. The smallness of the squares makes them weak in themselves. 3d. They are not formed in echelon, or so that their fire crosses missing one another. Other points might be reckoned going to indicate that the principle of these little squares may have been over-valued at the expense of the general theory of the skirmishing drill. However, as I have no disposition to deny the system of the groups of fours a certain merit, I limit the direct objection to the
following point. Let it be granted that the aggregating of the extended group into a prompt square of fours, back to back, furnishes a ready means of strengthening the line, yet I certainly believe that the subordinating of the next higher units, that is to say, the rally of the section and platoon circles, to the group square is a vice. It is pushing the spirit of system too far.* The small square of four is an unsuitable nucleus for the section or platoon circle. I give the reasons: 1st. Because the formation of the circle ought to allow (and the text requires) a fire by two ranks, which are inconveniently formed on the square nucleus. 2d. Because the sergeants are thrown into the ranks, not being able to get within the nucleus, and thus are prevented from assisting the officer effectually. 3d. Because the men, running in on either flank, cannot find their proper places in front and rear of the line (of battle) while those who are already formed cannot charge bayonets promptly, on account of the continued arrival of the men from the extremities of the late line.

I propose that the section (or platoon) circle be rallied thus: The men shall run to the officer, instead of his running to them. At the command of the captain the lieutenant forms his escort (if he have one) as a segment of the inner circle, and faced toward the approaching cavalry—he throwing up his sword, and they their bayonets, for a

* The figure in the Tactics does not follow the text. The figure makes the circle tangent to the line of battle. The text places its centre upon the line. Hardee and Casey follow the French plate in this oversight.
signal. The first arriving files rapidly complete this first circle, the sergeants and the bugler throwing themselves into it. The men coming in later form an outer concentric circle—the whole being finally in two ranks, and the circle compact, by reason of the two facts that there are several combatants in the centre, and that the officer by disposing the segment of the first or inner circle, can determine the dimension of both the circles, and graduate it to contain accurately his section or platoon.

In forming the circle as above, the men may all take the run without impeding one another—they are gaining ground toward the reserve—the point of the rally is known at once, and no time is lost in the officer's passing forward to a particular group; the circle is better formed for firing. It is obvious that the officer can choose the rear of any part of his line for the formation, by simply throwing himself to the desired point.

**Flank Deployments, &c.**

In the flank deployments, and in extending and closing, by the flank, it will, perhaps, be admitted on fair consideration that the men should face toward the designated point, at the command which indicates to them which it is, not delaying to face till the word MARCH. In close order, men cannot face and step off in the double-quick step, at one and the same time; they are not required to step off from a halt, by the flank, in any instance but this, which is an alteration of the drill as prescribed in Scott's tactics. At the command, *By the*
flank take intervals, the skirmishers should face preparatory to marching at the word MARCH.

The text of General Casey furnishes a means of re-forming the line, after rallying by fours, by sections and by platoons, but does not go beyond this. All rallies are made in the anticipation of ultimately gaining the reserve; and when rallied by fours, sections, or platoons, at the assemble, rally on the reserve, or rally on the battalion, the squares or circles should break up at once, and direct themselves to the rear.

In some systems of skirmishing the flanks of the deployed line are bent slightly to the rear, a few files thrown back, forming a curved line. This is, in effect, an application, on a small scale, of the principle of the echelon, and is a guard against being readily outflanked. There are times when its adoption would prove advantageous.

Changes of Front.

The prescribed system does not seem to provide adequately against an attack on the flank, where it is chiefly to be apprehended. If the enemy should appear suddenly on either flank, neither wheeling nor filing would be a sufficiently prompt movement to oppose him. If the whole line is required to change front to a flank, much time would be lost, the fire would be delayed, and the outward men much fatigued.

The centre is always the point of direction, unless otherwise ordered, and upon the centre as a pivot, changes of front can best be executed in an extended line.
The following method is taken from systems antecedent to our present one, and seems to deserve to be adopted.

The captain wishing to change front to the right, will command, 1. *Change front to the right.* The centre guide places himself on the line, to mark the centre, the right platoon (or section) faces *about* and then half faces to the right. The left platoon (or section) half faces to the right.

The captain commands, 2. *March* (or *Double-quick*—March). The skirmishers direct themselves, each by the shortest line, upon the new direction, arriving successively, the right wing facing about and aligning on the guide and centre group.
To change front to the left the commands and means are inverse.

If the captain wishes to change front, not on the centre, but on the extreme right or left file, the shortest way to form the new front seems to be as follows: The captain commands, 1. Right section forward into line—left section rally. The skirmishers of the right wing half face to the right, the guide marks the centre, those of the left wing face to the right. The reserve wheels to the right. 2. March (or Double-quick—March). The skirmishers of the right section form successively into line on the left of the right guide, and perpendicularly to their old line; the reserve deploys forward on its left file, and upon the line of the first platoon (or section). The left platoon or section rallies in rear of the centre of the line, and acts, for the time, as its reserve.

To form line to the left, the commands and means are inverse.

This movement places fresh skirmishers in action, and one-fourth more of them on the line; a decided advantage in the case of a sudden attack.

Flankers.

Flankers are thrown out, to prevent a sudden attack on a flank, which on a march is the most dangerous of all attacks. They must be at a sufficient distance to allow time to the column to form. The distance varies, with the country, and the kind of troops opposed. Three to four hundred paces is an ordinary distance. At night, or in foggy weather, or in a close or intersected country,
or if the enemy's cavalry hover on the flanks, half
the foregoing distance may suffice.

The men of a file should keep together and act
in concert, one stepping out of the line to examine
any suspicious place, whilst the other preserves
the chain.

A company of a battalion ordered to cover both
its flanks, will march out of the column, the first
platoon by the right flank, the second by the left;
gain two hundred paces to either flank, and deploy.
The groups may be held together, or may deploy
into single file. The figure p.156 will serve to
represent the movement ended.

Flankers encountering any impassable impedi-
ments—streams, bogs, &c.—will not pass around
them, leaving them to intervene between them-
selves and the column, but will close in toward the
flank.

On discovering the enemy they will instantly
fire. They will resist an attack firmly, retiring
only when recalled or overpowered.

Flankers must look out for the enemy on the
side they protect, should climb the elevations, and
examine all places that might serve for conceal-
ment.

When the column halts, flankers should face
outward, and throw out a few files as sentries.

Troops should never venture into a wood, pass,
or defile, without throwing forward skirmishers,
and sending out flankers.

Advanced Guard.

The advanced guard of infantry may or may not
COMPANY DEPLOYED AS FLANKERS TO A COLUMN.

be deployed in skirmishing order, according to circumstances. If deployed their duties are in many respects the same as those of the flankers.
SUPPLEMENT.

It is their duty to examine all villages, detached houses, enclosures, &c., before the near approach of the column.

If feeling for the enemy, upon discovering him they will not fire, but halt, observing his position, strength, and movements, and communicate to the rear. If, however, they are assailed, they must fire, to give instant notice, and must dispute the ground. But it must be impressed upon the men that they are not to fire unless they are perceived by the enemy, as by doing so they discover to him the presence of their own army.

Rear Guard.

Light infantry in the rear guard, may be unde- ployed, or it may be in skirmishing order, accord- ing to circumstances. If the column be advancing, the infantry of the rear guard is not usually de- ployed. But if the column be retreating before an enemy, the light infantry is formed in skirmishing order. Their proper front is toward the rear of the column. The company (if it be a company) must therefore be countermarched, if necessary. When the rear guard halts, the skirmishers must always face to the side of the enemy. In retiring they must constantly look behind and on the flanks to avoid surprise, and to rally if required. They must seize the positions of strength that the route may offer, to delay and oppose the enemy, falling back from one position to another.

In passing a bridge, ford, or defile, the reserve will pass first, and extend along the farther side, facing the enemy, to cover the passage of the
skirmishers. The skirmishers on approaching the bridge-head will make a stand, the flanks will immediately commence the passage, the extreme right and left files firing and at once retreating, the other files following these in succession, the centre files following last of all. The old line of skirmishers form for a reserve, two hundred paces beyond the bridge, and the late reserve, now deployed, take their places.

The duty of skirmishing in the rear guard is so exhausting, that frequent reliefs are absolutely necessary.

SCOTT'S MILITARY DICTIONARY.

Comprising Technical Definitions; Information on Raising and Keeping Troops; Actual Service, including make-shifts and improved materiel, and Law, Government, Regulation, and Administration relating to Land Forces.

By Colonel H. L. Scott, Inspector-General U. S. A. 1 vol., large 8vo, fully illustrated, half morocco. $5.

"We cannot speak too much in legitimate praise of this work."—National Intelligencer.

"We cordially commend it to public favor."—Washington Globe.

"This comprehensive and skilfully prepared work, supplies a want that has long been felt, and will be peculiarly valuable at this time as a book of reference."—Boston Commercial Bulletin.

"The Military Dictionary is splendidly got up in every way, and reflects credit on the publisher. The officers of every company in the service should possess it."—N. Y. Tablet.

"The work is more properly a Military Encyclopædia, and is profusely illustrated with engravings. It appears to contain every thing that can be wanted in the shape of information by officers of all grades."—Philadelphia North American.

"This book is really an Encyclopædia, both elementary and technical, and as such occupies a gap in military literature which has long been most inconveniently vacant. This book meets a present popular want, and will be secured not only by those embarking in the profession, but by a great number of civilians, who are determined to follow the descriptions, and to understand the philosophy of the various movements of the campaign. Indeed, no tolerably good library would be complete without the work."—N. Y. Times.
Rifles and Rifle Practice.

Adjutant-General's Office, Washington, June 28th, 1859.

Sir:—I am instructed to inform you that the War Department will take one thousand copies of Wilcox's Treatise on "Rifles and Rifle Practice," now being published by you.

I am, sir, very respectfully, your obedient servant,

E. D. Townsend,
Assistant Adjutant-General.

D. Van Nostrand, Esq.,
Publisher, city of New York.

"The book will be found intensely interesting to all who are watching the changes in the art of war arising from the introduction of the new rifled arms. We recommend to our readers to buy the book."—Military Gazette.

"This book is quite original in its character. That character is completeness. It renders a study of most of the works on the rifle that have been published quite unnecessary. We cordially recommend the book."—United Service Gazette, London.

SCHOOL OF THE GUIDES.

Designed for the use of the Militia of the United States.

Flexible cloth. 50 cents.

"The work is carefully got up, and is illustrated by numerous figures, which make the positions of the guides plain to the commonest understanding. Those of our sergeants who wish to be 'posted' in their duties should procure a copy."—Sunday Mercury, Philadelphia.

"It has received high praise, and will prove of great service in perfecting the drill of our Militia."—N. American and U. S. Gazette, Philadelphia.

"This neat hand-book of the elementary movements on which the art of the tactician is based, reflects great credit on Col. Le Gal, whose reputation is deservedly high among military men. No soldier should be without the 'School of the Guides.'"—N. Y. Daily News.
Army Officer's Pocket Companion. Principally designed for Staff Officers in the Field. Partly translated from the French of M. de Rouvre, Lieutenant-Colonel of the French Staff Corps, with additions from Standard American, French, and English Authorities. By Wm. P. Craighill, First Lieutenant U. S. Corps of Engineers, Assistant Professor of Engineering at the U. S. Military Academy, West Point. 1 vol. 18mo. Full roan. $1 50.

"I have carefully examined Capt. Craighill's Pocket Companion. I find it one of the very best works of the kind I have ever seen. Any Army or Volunteer Officer who will make himself acquainted with the contents of this little book, will seldom be ignorant of his duties in camp or field."

H. W. Halleck, Major-General U. S. A.

"I have carefully examined the 'Manual for Staff Officers in the Field.' It is a most invaluable work, admirable in arrangement, perspicuously written, abounding in most useful matters, and such a book as should be the constant pocket companion of every army officer, Regular and Volunteer."

G. W. Cullum, Brigadier-General U. S. A., Chief of General Halleck's Staff.

Halleck's International Law. International Law; or, Rules Regulating the Intercourse of States in Peace and War. By Major-Gen. H. W. Halleck, Commanding the Army. 1 vol. 8vo, law sheep. $6.

[By authority.]

CASEY'S

NEW INFANTRY TACTICS,

Vol. I.—School of the Soldier; School of the Company; Instruction for Skirmishers.

Vol. II.—School of the Battalion.

Vol. III.—Evolutions of a Brigade; Evolutions of a Corps d'Armée.

WAR DEPARTMENT, Washington, August 11, 1862.

The System of Infantry Tactics prepared by Brig.-Gen. Silas Casey, U. S. A., having been approved by the President, is adopted for the instruction of the Infantry of the Armies of the United States, whether Regular, Volunteer, or Militia, with the following modifications, viz.:

First, That portion which requires that two companies shall be permanently detached from the battalion as skirmishers, will be suspended.

Second, In Title First, Article First, the following will be substituted for Paragraph 6. viz.:

"A regiment is composed of ten companies, which will be habitually posted from right to left in the following order; first, sixth, fourth, ninth, third, eighth, fifth, tenth, seventh, second, according to the rank of Captain." EDWIN M. STANTON,

Secretary of War.

A

Treatise on the Camp and March.

With which is connected the Construction of Field Works and Military Bridges; with an Appendix of Artillery Ranges, &c. For the use of Volunteers and Militia in the United States. By Captain Henry D. Grafton, U. S. A. 1 vol. 12mo, cloth. 75 cents.
LIEBER ON GUERRILLA PARTIES.

HEADQUARTERS OF THE ARMY,}
Washington, Aug. 6, 1862.}

DR. FRANCIS LIEBER:

My Dear Doctor—Having heard that you have given much attention to the usages and customs of war as practised in the present age, and especially to the matter of guerilla war, I hope you may find it convenient to give to the public your views on that subject. The rebel authorities claim the right to send men, in the garb of peaceful citizens, to waylay and attack our troops, to burn bridges and houses, and to destroy property and persons within our lines. They demand that such persons be treated as ordinary belligerents, and that when captured they have extended to them the same rights as other prisoners of war. They also threaten that if such persons be punished as marauders and spies, they will retaliate by executing our prisoners of war in their possession.

I particularly request your views on these questions.

Very respectfully, your obedient servant,

H. W. HALLECK, General-in-Chief U. & A.

HAND-BOOK OF ARTILLERY,

For the Service of the United States Army and Militia.

The following is an extract from a Report made by the committee appointed at a meeting of the staff of the Artillery School at Fort Monroe, Va., to whom the commanding officer of the school had referred this work:

* * * "In the opinion of your Committee, the arrangement of the subjects and the selection of the several questions and answers have been judicious. The work is one which may be advantageously used for reference by the officers, and is admirably adapted to the instruction of non-commissioned officers and privates of Artillery.

"Your Committee do, therefore, recommend that it be substituted as a text-book in place of 'Burns' Questions and Answers on Artillery.'"

(Signed,) I. VOEGDES, Capt. 1st Artillery.
(Signed,) E. O. C. ORD, Capt. 3d Artillery.
(Signed,) J. A. HASKIN, Bot. Maj. and Capt. 1st Artillery.
The Political and Military History
OF THE
CAMPAIGN OF WATERLOO.
Translated from the French of General Barón de Jomini.
By Capt. S. V. Benét, U. S. Ordnance. 1 vol. 12mo, cloth, second edition. 75 cents.

“Baron Jomini has the reputation of being one of the greatest military historians and critics of the century. His merits have been recognized by the highest military authorities in Europe, and were rewarded in a conspicuous manner by the greatest military power in Christendom. He learned the art of war in the school of experience, the best and only finishing school of the soldier. He served with distinction in nearly all the campaigns of Napoleon, and it was mainly from the gigantic military operations of this matchless master of the art that he was enabled to discover its true principles, and to ascertain the best means of their application in the infinity of combinations which actual war presents. Jomini criticizes the details of Waterloo with great science, and yet in a manner that interests the general reader as well as the professional.”—New York World.

“The present volume is the concluding portion of his great work, ‘Vie Politique et Militaire de Napoléon,’ published in 1826. Capt. Benét’s translation of it has been for some time before the public, and has now reached a second edition; it is very ably executed, and forms a work which will always be interesting, and especially so at a time when military affairs are uppermost in the public mind.”—Philadelphia North American.

Maxims and Instructions on the Art of War.

Maxims, Advice, and Instructions on the Art of War; or, A Practical Military Guide for the use of Soldiers of all Arms and of all Countries. Translated from the French by Captain Lendy, Director of the Practical Military College, late of the French Staff, &c., &c. 1 vol. 18mo, cloth. 75 cents.

“A book of maxims, that is not as dry as a cask of ‘remainder biscuit,’ is a novelty in literature. The little volume before us is an exception to the general rule. It presents the suggestion of common sense in military affairs, with a certain brilliancy and point. One may read it purely for entertainment, and not be disappointed. At the same time, it is full of practical instructions of great value. When found in the pocket of an officer of volunteers, it will be the right book in the right place.”—N. Y. Tribune.
Nolan's System for Training Cavalry Horses.

By Kenner Garrard, Captain Fifth Cavalry, U. S. A. 1 vol. 12mo, cloth. Twenty-four lithographed plates. $1.50.

* * * "We are glad when competent men bring forward works that are intended to facilitate the formation of an effective cavalry force. Of this class is Nolan's System for Training Cavalry Horses, prepared for use in this country, by Captain Kenner Garrard, U. S. A. Captain Nolan was distinguished in the British service for his knowledge of the cavalry arm, and for his general talents. As the work had become out of print, Captain Garrard has done well in reproducing it; he has added to it a chapter on Rarcy's Method of Training Horses, and another on Horse Shoeing. The volume is well illustrated. It cannot be too warmly commended to general use."—Boston Daily Evening Traveller.

"It explains a perfectly successful method of gaining the mastery over the most refractory horse, and is no less adapted for the use of the rider for exercise, business, or pleasure, than of the cavalry officer. By the plan of the author, the time of training is greatly shortened; the progress is so gradual that it never makes the horse unpleasant, and the successive lessons tend to the development of mutual love and admiration between the parties."—N. Y. Tribune

Monroe's Company Drill.

CAVALRY:
ITS HISTORY, MANAGEMENT, AND USES IN WAR.

By J. Roemer, late an Officer of Cavalry in the service of the Netherlands. 1 vol. 8vo. With over two hundred beautifully engraved illustrations. $5.00.
THE ARTILLERIST'S MANUAL.
Compiled from various sources, and adapted to the service of the United States. Profusely illustrated with woodcuts and engravings on stone. Second edition, revised and corrected, with valuable additions. By Gen. John Gibbon, U. S. A. 1 vol. 8vo, half roan, $5; half russia, $6.

AMERICAN MILITARY BRIDGES,

New Bayonet Exercise.

This Manual was prepared for the use of the Corps of Cadets, and has been introduced at the Military Academy with satisfactory results. It is simply the theory of the attack and defence of the sword applied to the bayonet, on the authority of men skilled in the use of arms.

The Manual contains practical lessons in Fencing, and prescribes the defence against Cavalry, and the manner of conducting a contest with a Swordsman.

"This work merits a favorable reception at the hands of all military men. It contains all the instruction necessary to enable an officer to drill his men in the use of this weapon. The introduction of the sabre bayonet in our army, renders a knowledge of the exercise more imperative."—N. Y. Times.
THE "C. S. A."

AND THE

BATTLE OF BULL RUN.

(At Letter to an English Friend.) By J. G. Barnard, Major of Engineers, U. S. A., Brigadier-General, and Chief Engineer, Army of the Potomac. With five maps. 1 vol. 8vo, cloth. $1 50.

"This book was begun by the author as a letter to a friend in England, but as he proceeded and his MSS. increased in magnitude, he changed his original plan, and the book is the result. General Barnard gives by far the best, most comprehensible and complete account of the Battle of Bull Run we have seen. It is illustrated by some beautifully drawn maps, prepared for the War Department by the topographical engineers. He demonstrates to a certainty that but for the causeless panic the day might not have been lost. The author writes with vigor and earnestness, and has contributed one of the most valuable records yet published of the history of the war."—Boston Commercial Bulletin.

"A spirited and reliable view of the true character of the secession movement, and a correct account of the Battle of Bull Run, by a military man whose qualifications for the task are equalled but by few persons."—Cincinnati Gazette.

"The work is clearly written, and can but leave the impression upon every reader's mind that it is truth. We commend it to the perusal of every one who wants an intelligent, truthful, and graphic description of the 'C. S. A.' and the Battle of Bull Run."—New York Observer.

Rhymed Tactics, by "Gov."

1 vol. 18mo, paper. With portraits. 25 cents.

"It will strike the military man, familiar with the tedious routine of drill, by theory, practice and memory, as a most unique and valuable method of strengthening the latter, with the least mental exertion. The author is a thorough soldier, and his ability as a rhymer will be conceded by any intelligent reader."—N. Y. Leueader.

"Our author deserves great credit for the ingenuity he has displayed in putting into verse a manual which would at first glance seem to defy the most persistent efforts of the rhymer. The book contains a number of illustrations, representing some of the more difficult positions, in the figures of which, portraits of several prominent officers of the New York Volunteers may be recognized."—N. Y. Times.
Siege of Bomarsund (1854).

Journals of Operations of the Artillery and Engineers. Published by permission of the Minister of War. Illustrated by maps and plans. Translated from the French by an Army Officer. 1 vol. 12mo, cloth. 75 cents.

European Ordnance and Iron-Clad Defenses,

With some account of the American Practice, embracing the Fabrication and Test of Heavy Guns; Projectiles and Rifling; the Manufacture and Test of Armor, from official data, with a detailed account of English experiments; the principles, structure, and classification of Iron-Clad Vessels; Marine Steam Machinery, &c. By ALEX. L. HOLLEY, B. P., author of "American and European Railway Practice," &c. 1 vol. 8vo, cloth. With 250 illustrations. In press.

HOLLEY'S RAILWAY PRACTICE.

American and European Railway Practice, in the Economical Generation of Steam, including the materials and construction of Coal-burning Boilers, Combustion, the Variable Blast, Vaporization, Circulation, Superheating, Supplying and Heating Feed-water, &c., and the adaptation of Wood and Coke-burning Engines to Coal-burning; and in Permanent Way, including Road-bed, Sleepers, Rails, Joint Fastenings, Street Railways, &c., &c. By ALEXANDER L. HOLLEY, B. P. With 77 lithographed plates. 1 vol. folio, cloth. $10.
ELEME NT S OF

Military Art and History.

Comprising the History of the Tactics of the separate Arms, the Combination of the Arms, and the minor operations of war. By Edward de la Barre Duparcq, Captain of Engineers, and Professor of the Military Art in the Imperial School of Saint Cyr. Translated by Brig.-Gen. George W. Cullum, U. S. A., Chief of the Staff of Major-General H. W. Halleck, U. S. A.: 1 vol. 8vo, cloth. $4.

BENÉT'S MILITARY LAW.

A Treatise on Military Law and the Practice of Courts-Martial. By Capt. S. V. Benet, Ordnance Department, U. S. A., late Assistant Professor of Ethics, Law, &c., Military Academy, West Point. Adopted as the Text-Book at the Military Academy, West Point. 1 vol. 8vo, law sheep. $3.

Judge Advocate General's Office,}

October 18, 1862.

* * * So far as I have been enabled to examine this volume, it seems to me carefully and accurately prepared, and I am satisfied that you have rendered an acceptable service to the army and the country by its publication at this moment. In consequence of the gigantic proportions so suddenly assumed by the military operations of the Government, there have been necessarily called into the field, from civil life, a vast number of officers, unacquainted from their previous studies and pursuits, both with the principles of military law and with the course of judicial proceedings under it. To all such, this treatise will prove an easily accessible storehouse of knowledge, which it is equally the duty of the soldier in command to acquire, as it is to learn to draw his sword against the common enemy. The military spirit of our people now being thoroughly aroused, added to a growing conviction that in future we may have to depend quite as much upon the bayonet as upon the ballot box for the preservation of our institutions, cannot fail to secure to this work an extended and earnest appreciation. In bringing the results of legislation and of decisions upon the questions down to so recent a period, the author has added greatly to the interest and usefulness of the volume. Very respectfully, your obedient servant,

J. Holt.
TEXAS,
AND ITS LATE MILITARY OCCUPATION
AND EVACUATION.

By Capt. EDWIN D. PHILLIPS, 1st Infantry, U. S. A. 8vo, paper. 25 cents.

HINTS TO COMPANY OFFICERS.

By Capt. C. C. ANDREWS, 3d Regt. Minnesota Vols. 1 vol. 18mo, cloth. 50 cents.
VIELE’S HAND-BOOK.

Gunnery in 1858.
A Treatise on Rifles, Cannon, and Sporting Arms. By Wm. Greener, C. E. 1 vol. 8vo, cloth. $3.

Manual of Heavy Artillery.
For the use of Volunteers. 1 vol. 12mo, red cloth. 75 cents.

"Should be in the hands of every Artillerist."—N. Y. Illustrated News.

"This is a concise and well-prepared Manual, adapted to the wants of Volunteers. The instruction, which is of an important nature, is presented in a simple and clear style, such as will be easily understood. The volume is also illustrated with explanatory cuts and drawings. It is a work of practical value, and one needed at the present time in the service."—Boston Commercial Bulletin.

"An indispensable Manual for all who wish easily and accurately to learn the school of the Artillerist."—N. Y. Commercial Advertiser.

AUSTRIAN INFANTRY TACTICS.

NEW MANUAL OF SWORD AND SABRE EXERCISE.
Benton's Ordnance and Gunnery.

A Course of Instruction in Ordnance and Gunnery, compiled for the use of the Cadets of the United States Military Academy. By Capt. J. G. Benton, Ordnance Department, late Instructor of Ordnance and Gunnery, Military Academy, West Point. Principal Assistant to Chief of Ordnance, U. S. A. Second edition, revised and enlarged. 1 vol. 8vo, half morocco, cuts. $4.

"We cannot commend this work too highly, both for the substance it contains, and the highly finished manner in which it has been issued by the publisher. There is no one book within the range of our military reading and study, that contains more to recommend it upon the subject of which it treats. It is as full and complete as the narrow compass of a single volume would admit, and the reputation of the author as a scientific and practical artilleryman, is a sufficient guarantee for the correctness of his statements and deductions, and the thoroughness of his labors."—N. Y. Observer.

"A Great Military Work.—We have before us a bound volume of nearly 600 pages, which is a complete and exhaustive 'Course of Instruction in Ordnance and Gunnery,' as its title states, and goes into every department of the science, including gunpowder, projectiles, cannon, carriages, machines and implements, small arms, pyrotechny, science of gunnery, loading, pointing and discharging firearms, different kinds of fires, effects of projectiles and employment of artillery. These severally form chapter heads, and give thorough information on the subjects on which they treat. The most valuable and interesting information on all the above topics, including the history, manufacture, and use of small arms, is here concentrated in compact and convenient form, making a work of rare merit and standard excellence. The work is abundantly and clearly illustrated."—Boston Traveller.

SIEGE AND REDUCTION OF

Fort Pulaski, Georgia.

SWORD-PLAY.
THE MILITIAMAN'S MANUAL AND SWORD-PLAY WITHOUT A MASTER.

Rapier and Broad-Sword Exercises copiously Explained and Illustrated; Small-Arm Light Infantry Drill of the United States Army; Infantry Manual of Percussion Muskets; Company Drill of the United States Cavalry. By Major M. W. BERRIMAN, engaged for the last thirty years in the practical instruction of Military Students. Second edition. 1 vol. 12mo, red cloth. $1.

"Captain Berriman has had thirty years' experience in teaching military students, and his work is written in a simple, clear, and soldierly style. It is illustrated with twelve plates, and is one of the cheapest and most complete works of the kind published in this country."—N. Y. World.

"This work will be found very valuable to all persons seeking military instruction; but it recommends itself most especially to officers, and those who have to use the sword or sabre. We believe it is the only work on the use of the sword published in this country."—N. Y. Tablet.

Manual for Engineer Troops.

Consisting of—

Part I. Pointon Drill.
II. Practical Operations of a Siege.
III. School of the Sap.
IV. Military Mining.
V. Construction of Batteries.

By Captain J. C. Duane, Corps of Engineers, U. S. A. 1 vol. 12mo, half morocco, with plates. $2.

"I have carefully examined Capt. J. C. Duane's 'Manual for Engineer Troops,' and do not hesitate to pronounce it the very best work on the subject of which it treats."

H. W. HALLECK, Major-General, U. S. A.

"A work of this kind has been much needed in our military literature. For the army's sake, I hope the book will have a wide circulation among its officers."

G. B. McCLELLAN, Major-General, U. S. A.
Gunnery Instructions.

"It is a thorough work, treating plainly on its subject, and contains also some valuable hints to executive officers. No officer in the volunteer navy should be without a copy."—Boston Evening Traveller.

"This work, which is appropriately dedicated to the Acting Masters and Masters' Mates of the United States Navy, contains detailed and specific instructions on all points connected with the use and management of guns of every kind in the naval service. It has full illustrations, and many of these of the most elementary character, especially designed for the use of volunteers in the navy. The duties of executive officers and of the division officers are so clearly set forth, that 'he who runs may read' and understand. The manual exercise is explicit, and rendered simple by diagrams. Forms of watch and quarter bills are given; and at the close there is a table of ranges according to the kind and caliber of gun, the weight of the ball and the charge of powder. A valuable little hand-book."—Philadelphia Inquirer.

"I have looked through Lieut. Barrett's book, and think it will be very valuable to the volunteer officers who are now in the naval service."

C. R. P. Rodgers, Commanding U. S. Steam Frigate Wabash.

ELEMENTARY INSTRUCTION IN NAVAL ORDNANCE AND GUNNERY.

By James H. Ward, Commander U. S. N., Author of "Naval Tactics," and "Steam for the Million." New edition, revised and enlarged. 8vo, cloth. $2.

"It conveys an amount of information in the same space to be found nowhere else, and given with a clearness which renders it useful as well to the general as the professional inquirer."—N. Y. Evening Post.

"This volume is a standard treatise upon the subject to which it is devoted. It abounds in valuable information upon all the points bearing upon Naval Gunnery."—N. Y. Commercial Advertiser.

"The work is an exceedingly valuable one, and is opportunely issued."—Boston Journal.
SCREW PROPULSION.

Notes on Screw Propulsion, its Rise and History. By Capt. W. H. Walker, U. S. N. 1 vol. 8vo, cloth. 75 cents.

* * * "After thoroughly demonstrating the efficiency of the screw, Mr. Walker proceeds to point out the various other points to be attended to in order to secure an efficient man-of-war, and enulogizes throughout the readiness of the British Admiralty to test every novelty calculated to give satisfactory results. * * * Commander Walker’s book contains an immense amount of concise, practical data, and every item of information recorded, fully proves that the various points bearing upon it have been well considered previously to expressing an opinion."—London Mining Journal.

"Every engineer should have it in his library."—American Engineer.

A Treatise on Ordnance and Naval Gunnery.

Compiled and arranged as a Text-Book for the U. S. Naval Academy. By Lieut.-Commander Edward Simpson, U. S. N. Second edition, revised and enlarged. 1 vol. 8vo; plates and cuts, half morocco. $4.

BUREAU OF ORDNANCE AND HYDROGRAPHY,

July 9th, 1859.

Sir:—* * * The Secretary of the Navy approves of the use of this work as a text-book for the Academy. * * *
Respectfully, your obedient servant,

D. N. INGRAHAM, Chief of Bureau.

Capt. G. S. Blake,
Superintendent of Naval Academy, Annapolis, Md.

"It is scarcely necessary for us to say that a work prepared by a writer so practically conversant with all the subjects of which he treats, and who has such a reputation for scientific ability, cannot fail to take at once a high place among the text-books of our naval service. It has been approved by the Secretary of the Navy, and will henceforth be one of the standard authorities on all matters connected with Naval Gunnery."—N. Y. Herald.

"Originally designed as a text-book, it is now enlarged, and so far modified in its plan as to make it an invaluable hand-book for the naval officer. It is comprehensive—preserving the cream of many of the best books on ordnance and naval gunnery, and is printed and illustrated in the most admirable manner."—N. Y. World.
Notes on Sea-Coast Defence,

"This small volume, by one of the most accomplished officers in the United States service, is especially valuable at this time. Concisely and thoroughly Major Barnard discusses the subjects included in this volume, and gives information that will be read with great profit by military men, and by all interested in the art of war as a defensive force."—N. Y. Commercial.

"It is no light compliment when we say that Major Barnard's book does no discredit to the corps to which he belongs. He writes concisely, and with a thorough knowledge of his subject."—Russell's Army and Navy Gazette.

STEAM FOR THE MILLION.

"A most excellent work for the young engineer and general reader. Many facts relating to the management of the boiler and engine are set forth with a simplicity of language, and perfection of detail, that brings the subject home to the reader. Mr. Ward is also peculiarly happy in his illustrations."—American Engineer.

STANDING ORDERS OF THE SEVENTH REGIMENT, NATIONAL GUARD.

"This, which is a new edition of a popular work, cannot fail to be eagerly sought after, as presenting clearly and succinctly the principles of organization and discipline of a most favorite corps. An appropriate index facilitates reference to the matter of the volume."—New Yorker.
HISTORY
OF THE
United States Naval Academy,
With Biographical Sketches, and the names of all the Superintendents, Professors, and Graduates, to which is added a Record of some of the earliest Votes by Congress, of Thanks, Medals, and Swords to Naval Officers. By EDWARD CHAUNCEY MARSHALL, A. M. 1 vol. 12mo, cloth, plates. $1.

"The book before us affords a good account of the naval school from its first establishment under the auspices of Secretary Bancroft, with full statements of the regulations, requisites for admission, course of study, etc. It is a reasonable and useful contribution to the history of education in this country."—N. Y. Independent.

"This is a most welcome volume. All that throws light on the history of our army and navy, now needs study; and the Naval Academy, though really so recent, well deserves a history. Mr. Marshall has depicted, in clear and graphic language, the vast struggle for years to give our navy, what the navy of every nation has, an academy to form the young officers for their important duties."—N. Y. Historical Magazine.

"Every naval man will find it not only a pleasant companion, but an invaluable book of reference. It is seldom that so much information is made accessible in so agreeable a manner in so small a space."—N. Y. Times.

TOTTEN'S NAVAL TEXT-BOOK.

"This work is prepared for the Midshipmen of the United States Navy. It is a complete manual of instructions as to the duties which pertain to their office, and appears to have been prepared with great care, avoiding errors and inaccuracies which had crept into a former edition of the work, and embracing valuable additional matter. It is a book which should be in the hands of every midshipman, and officers of high rank in the navy would often find it a useful companion."—Boston Journal.
THE
AUTOMATON REGIMENT,
or
Infantry Soldiers’ Practical Instructor.

For all REGIMENTAL MOVEMENTS IN THE FIELD.
By G. DOUGLAS BREWERTON, U. S. Army. Neatly put
up in boxes, price $1; when sent by mail, $1 40.

The “Automaton Regiment” is a simple combination of blocks
and counters, so arranged and designated by a carefully considered
contrast of colors, that it supplies the student with a perfect mini-
ture regiment, in which the position in the battalion of each com-
pany, and of every officer and man in each division, company, platoon
and section, is clearly indicated. It supplies the studious soldier
with the means whereby he can consult his “tactics,” and at the
same time join practice to theory by manoeuvring a mimic regiment.

HEADQUARTERS, MILITARY GOVERNOR, \{ 
Department of the South,
Beaufort, South Carolina, Oct. 21st, 1862. \} 

I hereby certify that I have examined the “Automaton Regi-
ment,” invented by G. Douglas Brewerton, late of the U. S. Regular
Army, and now serving as a Volunteer Aid upon my military staff,
and believe that his invention will prove a useful and valuable assist-
ant to every student of military tactics. I take pleasure in recom-
mending it accordingly.

R. SAXTON,
Brig.-General Volunteers.

A System of Target Practice.

For the use of Troops when armed with the Musket, Rifle-
Musket, Rifle, or Carbine. Prepared, principally from
the French, by Captain HENRY HETH, 10th Infantry, U.
S. A. 50 cents.

"WAR DEPARTMENT, Washington, March 1st, 1868.
"The ‘System of Target Practice,’ prepared under direction of the
War Department, by Captain Henry Heth, 10th Infantry, having
THE AUTOMATON COMPANY;
OR,
Infantry Soldiers' Practical Instructor.
For all COMPANY MOVEMENTS IN THE FIELD. By G. DOUGLAS BREWERTON, U. S. A. Price in boxes, $1 25; when sent by mail, $1 95.

THE AUTOMATON BATTERY;
OR,
Artillerists' Practical Instructor.
For all MOUNTED ARTILLERY MANŒUVRES IN THE FIELD. By G. DOUGLAS BREWERTON, U. S. A. Price in boxes, $1; when sent by mail, $1 40.

UNION FOUNDATIONS.

MODELS OF FORTIFICATIONS.

VAUBAN'S FIRST SYSTEM.
One Front and two Bastions—Scale, 20 yards to an inch.

THE MODERN SYSTEM.
One Front—Scale, 20 yards to an inch.

FIELD-WORKS.
The Square Redoubt—Scale, 5 yards to an inch.

Mr. Kimber's three volumes, viz., Vauban's First System, The Modern System, and Field-Works, will accompany the models.
Lessons and Practical Notes on Steam,

The Steam Engine, Propellers, &c., &c., for Young Marine Engineers, Students, and others. By the late W. R. King, U. S. N. Revised by Chief-Engineer J. W. King, U. S. N. Third edition, enlarged. 8vo, cloth. $1 50.

"This is a new edition of a valuable work of the late W. R. King, U. S. N. It contains lessons and practical notes on Steam and the Steam Engine, Propellers, &c. It is calculated to be of great use to young marine engineers, students, and others. The text is illustrated and explained by numerous diagrams and representations of machinery. This new edition has been revised and enlarged by Chief Engineer J. W. King, U. S. N., brother to the deceased author of the work."—Boston Daily Advertiser.

"This is one of the best, because eminently plain and practical, treatises on the Steam Engine ever published."—Philadelphia Press.

"Its re-publication at this time, when so many young men are entering the service as naval engineers, is most opportune. Each of them ought to have a copy."—Philadelphia Evening Bulletin.

MANUAL OF INTERNAL RULES AND REGULATIONS FOR MEN-OF-WAR.

"Among the professional publications for which we are indebted to the war, we willingly give a prominent place to this useful little Manual of Rules and Regulations to be observed on board of ships of war. Its authorship is a sufficient guarantee for its accuracy and practical value; and as a guide to young officers in providing for the discipline, police, and sanitary government of the vessels under their command, we know of nothing superior."—N. Y. Herald.

"Should be in the hands of every naval officer, of whatever grade, and will not come amiss to any intelligent mariner."—Boston Traveler.

"A work which will prove of great utility, in both the naval..."
NAVAL LIGHT ARTILLERY.

"The service for which this is the text-book of instruction, is of special importance in the present war. The use of light boat-pieces is constant and important, and young officers are frequently obliged to leave their boats, take their pieces ashore, and manoeuvre them as field artillery. Not unfrequently, also, they are incorporated, when ashore, with troops, and must handle their guns like the artillery soldiers of a battery. 'The Exercise of the Howitzer Afloat' was prepared and arranged by Captain Dahlgren, whose name gives additional sanction and value to the book. A Manual for the Sword and Pistol is also given. The plates are numerous and exceedingly clear, and the whole typography excellent."—Philadelphia Inquirer.

Evolutions of Field Batteries of Artillery.

Translated from the French, and arranged for the Army and Militia of the United States. By Gen. Robert Anderson, U. S. A. Published by order of the War Department. 1 vol. cloth, 32 plates. $1.

WAR DEPARTMENT, Nov. 2d, 1859.

The System of "Evolutions of Field Batteries," translated from the French, and arranged for the service of the United States, by Major Robert Anderson, of the 1st Regiment of Artillery, having been approved by the President, is published for the information and government of the army.

All Evolutions of Field Batteries not embraced in this system, are prohibited, and those herein prescribed will be strictly observed.

J. B. FLOYD, Secretary of War.

"This system having been adopted by the War Department, is to the artillerist what Hardee's Tactics is to the infantry soldier;
THE BORROWER WILL BE CHARGED AN OVERDUE FEE IF THIS BOOK IS NOT RETURNED TO THE LIBRARY ON OR BEFORE THE LAST DATE STAMPED BELOW. NON-RECEIPT OF OVERDUE NOTICES DOES NOT EXEMPT THE BORROWER FROM OVERDUE FEES.
